Project No. **13231.000.000** 

March 28, 2017

City of San Mateo C/O Ms. Margaret M. Regan Stantec (formerly MWH Global) 3010 W Charleston, Suite 100 Las Vegas, NV 89012

Subject: Exposition Center San Mateo Basins 2 and 3 San Mateo, California

#### PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Ms. Regan:

ENGEO is pleased to present our phase I environmental site assessment of the subject property (Study Areas 1 and 2), located in San Mateo, California. The attached report includes a description of the site assessment activities, along with ENGEO's findings, opinions, and conclusions regarding the Study Areas.

ENGEO has the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the Study Areas, and has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. We declare that, to the best of our professional knowledge and belief, the responsible charge for this study meets the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312 and ASTM 1527-13.

We are pleased to be of service to you on this project. If you have any questions concerning the contents of our report, please contact us.

Sincerely,

**ENGEO** Incorporated

Yanet Zepeda yz/ja/cjn

Jeffrey A. Adams, PhD

## **EXECUTIVE SUMMARY**

ENGEO conducted a phase I environmental site assessment for two portions of the property located within the City of San Mateo Exposition Center, located at 2495 South Delaware Street in San Mateo, California (Study Area 1 and Study Area 2). Study Area 1 and Study Area 2, approximately 1 and 2.2 acres in area, respectively, occupy portions of the parent parcel identified by Assessor's Parcel Number (APN) 040-030-220.

Study Area 1 and Study Area 2 are situated within the City of San Mateo Exposition Center. Study Area 1 is currently occupied by an asphalt-paved parking lot. Study Area 2 is currently occupied by a gravel parking yard with stored trailers, trucks, and large metal containers. The parent parcel of Study Areas 1 and 2 is bound by Saratoga Drive to the north and east, South Delaware Street to the west and a school and park to the south.

Review of historical records indicates that Study Area 1 has been occupied by paved parking since at least 1974; prior to 1974 the Study Area was undeveloped with the exception of some land disturbance possibly associated with an adjacent airport in the 1940s. Study Area 2 remained undeveloped until at least 2005, at which time it began to be used as a parking yard.

This assessment included a review of local, state, tribal, and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps and physical setting sources. A reconnaissance of Study Areas 1 and 2 was conducted to review site use and current conditions to check for the storage, use, production or disposal of hazardous or potentially hazardous materials.

The site reconnaissance and records review did not find documentation or physical evidence of soil or groundwater impairments associated with the use or past use of Study Areas 1 and 2. A review of regulatory databases maintained by county, state, tribal, and federal agencies found no documentation of hazardous materials violations or discharge on Study Areas 1 and 2 and did not identify contaminated facilities within the appropriate American Society for Testing and Materials (ASTM) search distances that would reasonably be expected to impact the Study Area.

Based on the findings of this assessment, no Recognized Environmental Conditions (RECs), controlled RECs, or Historical RECs have been identified for Study Areas 1 and/or 2.

Based on the review of regulatory databases and site reconnaissance, we present information on a feature of potential environmental concern that was contained in the databases related to the Study Areas. This feature was not considered to be an REC. We briefly discuss the feature below.

 The parent parcel (040-030-020), outside of Study Areas 1 and 2 is associated with a former leaking underground storage tank (LUST) case. The LUST case is located approximately 650 feet east of Study Area 1 and 850 feet northwest of Study Area 2. The LUST was removed in 1997 (See Figure 2). The San Mateo County Groundwater Protection Program issued a Closure Memorandum dated January 28, 2002 for the LUST case. It is our opinion that the risk of potential environmental impact to Study Areas 1 and 2 is low.

ENGEO has performed a phase I environmental site assessment in general conformance with the scope and limitations of ASTM E1527 of approximately 1 and 2.2-acre portions of the parent parcel identified by Assessor's Parcel Number (APN) 040-030-220, San Mateo, California, Study Area 1 and Study Area 2. Any exceptions to, or deletions from, this practice are described in Section(s) 1.7 and 6.2 of this report.

ENGEO recommends no further environmental studies at this time.

We understand that material offhaul may occur as part of future development. It may be prudent to perform a preliminary material offhaul screening program with laboratory analysis to evaluate potential offhaul disposal and reuse options.

## 1.0 INTRODUCTION

ENGEO conducted a phase I environmental site assessment for two portions of the subject property (Study Area 1 and Study Area 2) located within the City of San Mateo Exposition Center at 2495 South Delaware Street in San Mateo, California (Figure 1). Study Area 1 is currently occupied by an asphalt-paved parking lot. Study Area 2 is currently occupied by a gravel parking yard with stored trailers, trucks and large metal containers.

#### 1.1 SITE LOCATION

The two separate study areas are located within the City of San Mateo Exposition center located at 2495 South Delaware Street in San Mateo, California (Figure 1). Study Area 1 and Study Area 2, approximately 1 and 2.2 acres in area, respectively, occupy portions of the property identified as Assessor's Parcel Number (APN) 040-030-220 (Figure 3). The parent parcel of Study Area 1 and 2 is bound by Saratoga Drive to the north and east, South Delaware Street to the west and a school and park to the south.

#### 1.2 SITE AND VICINITY CHARACTERISTICS

According to published topographic maps, Study Areas 1 and 2 are relatively level, situated at an elevation of approximately 11 feet above mean sea level (msl) (Figure 4). Review of the regional geologic mapping by Brabb et al (1998) found that the Study Areas are underlain by historic artificial fill consisting of loose to very well consolidated gravel, sand, silt and clay in various combinations.

Geocheck – Physical Setting Source Summary of the Environmental Resources Data report (Appendix A) indicated no Federal United States Geological Survey (USGS) wells located within 1 mile of the Study Areas. The Physical Setting Source Summary also provided hydrogeologic information for use as an indicator of groundwater flow direction in the immediate area. This section indicated no wells located within 1 mile of the Study Areas.

We reviewed the Department of Water Resources On-line Water Data Library for depth to water in the vicinity of the Study Areas. The website did not identify any wells within 1 mile of the Study Areas.

We reviewed EnviroStor, a website maintained by the State of California, Department of Toxic Substances Control, and GeoTracker, a website maintained by the State of California, Water Resources Control Board, for nearby facilities with records that include depth to groundwater measurements. The following information was obtained regarding local groundwater conditions.

PROXIMITY TO STUDY AREA 1	PROXIMITY TO STUDY AREA 2	REPORTED DEPTH TO GROUNDWATER	REPORTED GROUNDWATER FLOW DIRECTION
800 feet south	1,500 feet west	21/2 to 4 feet	north-northeast
1,000 feet south	1,800 feet southwest	6 to 7 feet	northeast
1,200 feet north	2,350 feet northwest	5 to 6 feet	west-southwest

#### TABLE 1.2-1: Local Groundwater Conditions

The site-specific depth to groundwater and direction of groundwater flow was not determined as part of this assessment. Fluctuations in groundwater levels may occur seasonally and over a period of years due to variations in precipitation, temperature, and other factors.

We reviewed the Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) website and map database to determine if any historic oil and/or gas wells were located within Study Areas 1 and 2. No geothermal wells were mapped within 1 mile of Study Areas 1 and 2.

#### 1.3 CURRENT USE OF STUDY AREAS/DESCRIPTION OF SITE IMPROVEMENTS

Study Area 1 and Study Area 2, approximately 1 and 2.2 acres in area, respectively, occupy portions of the City of San Mateo Exposition Center. Study Area 1 is currently occupied by an asphalt-paved parking lot. Study Area 2 is currently occupied by a gravel parking yard with stored trailers, trucks, and large metal containers.

#### 1.4 CURRENT USE OF ADJOINING PROPERTIES

The parent parcel of the two Study Areas is located in a mixed-use area of San Mateo. The parent parcel is bound by Saratoga Drive to the north and east, South Delaware Street to the west and a school and park to the south.

#### 1.5 PURPOSE OF PHASE I ENVIRONMENTAL SITE ASSESSMENT

This assessment was performed at the request of City of San Mateo and Stantec (formerly MWH Global).for the purpose of environmental due diligence during property acquisition. The objective of this phase I environmental site assessment is to identify Recognized Environmental Conditions (RECs) associated with the Study Area. As defined in the ASTM Standard Practice E 1527-13, an REC is "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

#### 1.6 DETAILED SCOPE OF SERVICES

The scope of services performed included the following:

- A review of publicly available and practically reviewable standard local, state, tribal, and federal environmental record sources.
- A review of publicly available and practically reviewable standard historical sources, aerial photographs, fire insurance maps and physical setting sources.
- A reconnaissance of Study Areas 1 and 2 to review site use and current conditions. The reconnaissance was conducted to check for the storage, use, production or disposal of hazardous or potentially hazardous materials.
- Preparation of this report with our findings, opinions, and conclusions.

#### 1.7 SIGNIFICANT ASSUMPTIONS OR DEVIATIONS FROM ASTM STANDARD PRACTICE

No significant assumptions or deviations were encountered during this assessment. Data gaps identified during the preparation of this report are presented in Section 6.2.

#### 1.8 LIMITATIONS AND EXCEPTIONS OF ASSESSMENT

The professional staff at ENGEO strives to perform its services in a proper and professional manner with reasonable care and competence but is not infallible. The recommendations and conclusions presented in this report were based on the findings of our study, which were developed solely from the contracted services. The findings of the report are based in part on contracted database research, out-of-house reports and personal communications. The opinions formed by ENGEO are based on the assumed accuracy of the relied upon data in conjunction with our relevant professional experience related to such data interpretation. ENGEO assumes no liability for the validity of the materials relied upon in the preparation of this report.

This document must not be subject to unauthorized reuse; that is, reuse without written authorization of ENGEO. Such authorization is essential because it requires ENGEO to evaluate the document's applicability given new circumstances, not the least of which is passage of time. The findings from a phase I environmental site assessment are valid for one year after completion of the report. Updates of portions of the assessment may be necessary after a period of 180 days after completion.

This phase I environmental site assessment is not intended to represent a complete soil or groundwater characterization, nor define the depth or extent of soil or groundwater contamination. It is intended to provide an evaluation of potential environmental concerns associated with the use of Study Areas 1 and 2. A more extensive assessment that would include a subsurface exploration with laboratory testing of soil and groundwater samples could provide more definitive information concerning site-specific conditions. If additional assessment activities are considered for Study Areas 1 and 2 and if other entities are retained to provide such services, ENGEO cannot be held responsible for any and all claims arising from or resulting from the performance of such services by other persons or entities. ENGEO can also not be held responsible from any and all claims arising or resulting from clarifications, adjustments, modifications, discrepancies or other changes necessary to reflect changed field or other conditions.

#### 1.9 SPECIAL TERMS AND CONDITIONS

ENGEO has prepared this report for the exclusive use of City of San Mateo and Stantec. It is recognized and agreed that ENGEO has assumed responsibility only for undertaking the study for the client. The responsibility for disclosures or reports to a third party and for remedial or mitigative action shall be solely that of the Client.

Laboratory testing of soil or groundwater samples was not within the scope of the contracted services. The assessment did not include an asbestos survey, an evaluation of lead-based paint, an inspection of light ballasts for polychlorinated biphenyls (PCBs), a radon evaluation, or a mold survey.

This report is based upon field and other conditions discovered at the time of preparation of ENGEO's assessment. Visual observations referenced in this report are intended only to represent conditions at the time of the reconnaissance. ENGEO would not be aware of site contamination, such as dumping and/or accidental spillage, that occurred subsequent to the reconnaissance conducted by ENGEO personnel.

## 2.0 USER-PROVIDED INFORMATION

#### 2.1 **PROPERTY RECORDS**

#### 2.1.1 Title Report/Ownership

The Title Report lists recorded land title detail, ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against a subject property. Laws and regulations pertaining to land trusts vary from state to state and the detail of information presented in a Title Report can vary greatly by jurisdiction. As a result, ENGEO utilizes a Title Report, when provided to us, as a supplement to other historical record sources.

A Preliminary Title Report for the parent parcel of the Study Areas was not provided for our review prior to the publication of this document.

#### 2.1.2 Environmental Liens and Activity Use Limitations

Environmental Data Resources, Inc. (EDR) provided an Environmental Lien Search Report for the parent parcel of Study Areas 1 and 2 prepared by NETR Real Estate Research and Information. The report, which is included in Appendix D, did not list environmental liens associated with the APN of the parent parcel of Study Areas 1 and 2.

#### 2.2 USER KNOWLEDGE OF STUDY AREA

Ms. Dana Stoehr, Key Site Manager of the City of San Mateo Exposition Center, completed Key Site Manager and Client environmental site assessment questionnaires pertaining to user-related applicable environmental information regarding the Site. In the questionnaires, Ms. Stoehr did not identify potential environmentally related issues with the Site. However, Ms. Stoehr did acknowledge an underground storage tank had been previously present within the parent parcel of the Site. The questionnaires are presented in their entirety in Appendix G.

## 3.0 RECORDS REVIEW

#### 3.1 PREVIOUS ENVIRONMENTAL REPORTS

We were not provided and did not encounter in our research previous environmental reports for Study Areas 1 and/or 2 during our records review. See section 3.4 for a summary of the files identified during our agency file review activities.

#### 3.2 HISTORICAL RECORD SOURCES

The purpose of the historical record review is to develop a history of the previous uses or occupancies of Study Areas 1 and 2 and surrounding area in order to identify those uses or

occupancies that are likely to have led to recognized environmental conditions on Study Area 1 and/or 2.

#### 3.2.1 Historical Topographic Maps

Historical USGS topographic maps were reviewed to determine if discernible changes in topography or improvements pertaining to Study Areas 1 and 2 had been recorded. The following maps were provided to us through an EDR Historical Topographic Map Report, presented in Appendix C.

QUAD	YEAR	SERIES	SCALE
San Mateo	1896	15	1:62500
San Mateo	1899	15	1:62500
San Mateo	1915	15	1:62500
San Mateo	1939	15	1:62500
San Mateo	1947	7.5	1:24000
San Mateo	1949	7.5	1:24000
San Mateo	1956	7.5	1:24000
San Mateo	1968	7.5	1:24000
San Mateo	1973	7.5	1:24000
San Mateo	1980	7.5	1:24000
San Mateo	1993	7.5	1:24000
San Mateo	1997	7.5	1:24000
San Mateo	2012	7.5	1:24000

#### TABLE 3.2.1-1: Historical Topographic Maps

<u>1896, 1899, and 1915 Maps</u> – The parent parcel of Study Areas 1 and 2 is mapped within bay marshland. A railroad and sparse development with an area identified as Homestead is shown to the west of the Study Areas. No structures are depicted within Study Area 1 or 2.

<u>1939 Map</u> – The parent parcel of Study Areas 1 and 2 and surrounding area are no longer mapped as marshland. A tributary of Seal Creek is mapped traversing Study Area 1. A road is mapped immediately north of Study Area 2. Bay Meadows racetrack is mapped immediately south of Study Area 2. Two structures are mapped within the parent parcel of the two Study Areas. Development of the surrounding area has progressed north, west and south of the Study Areas. No structures are depicted within Study Area 1 or 2.

<u>1947, 1949 Maps</u> – Bay Meadows Airport is mapped immediately adjacent to Study Areas 1 and 2, occupying the parent parcel. Development of the surrounding area has progressed. No structures are depicted within Study Area 1 or 2.

<u>1956, 1968, 1973 Maps</u> – Bay Meadows Airport is no longer mapped within the parent parcel of Study Areas 1 and 2. The area occupied by the parent parcel is identified as Fiesta Grounds and County Fairgrounds. Eight structures are mapped within the parent parcel but do not occupy Study Area 1 or 2. North of Study Areas 1 and 2, Fiesta Gardens School and the County Fairground are now shown. Development of the surrounding area has progressed.

<u>1980, 1993, 1997, 2012 Map</u> – The mapped conditions of Study Areas 1 and 2 and the surrounding areas appear similar to the previous maps, with the exception of the 2012 map where a formerly mapped structure associated with the Bay Meadows Racetrack immediately south of Study Area 2 is no longer mapped.

#### 3.2.2 Aerial Photographs

The following aerial photographs, provided by EDR, were reviewed for information regarding past conditions and land use at Study Areas 1 and 2 and in the immediate vicinity. These photographs are presented in Appendix E.

YEAR	SCALE
1943	1"=500'
1946	1"=500'
1956	1"=500'
1963	1"=500'
1968	1"=500'
1974	1"=500'
1982	1"=500'
1993	1"=500'
1998	1"=500'
2005	1"=500'
2009	1"=500'
2010	1"=500'
2012	1"=500'
	1943         1946         1956         1963         1968         1974         1982         1993         1998         2005         2009         2010

#### TABLE 3.2.2-1: Aerial Photographs

<u>1943</u> Photograph – Study Areas 1 and 2 appear to be undeveloped. A road is visible immediately north of Study Area 2. Two or more structures and disturbed land are visible in the parent parcel of the Study Areas. North of the Study Areas, undeveloped land and Seal Creek tributaries are visible. The Bay Meadows Racetrack is visible south of the Study Areas. West of the Study Areas, residential development is visible.

<u>1946</u> Photograph – Study Area 2 conditions appear similar to the 1943 photograph. Land disturbance, possibly related to Bay Meadows Airport, is visible across Study Area 1. Progress of residential development in the surrounding areas is visible.

<u>1956 Photograph</u> – Study Areas 1 and 2 still appear undeveloped. Several structures are now visible within the parent parcel of the study areas, including a structure immediately south of Study Area 1. Residential and likely commercial development north, south and west of the Study Areas has progressed.

<u>1963, 1968 Photographs</u> – Study Area 1 and 2 conditions appear similar to the 1956 photograph. The structure immediately south of Study Area 1 is no longer visible within the parent parcel.

<u>1974, 1982 Photographs</u> – Study Area 2 conditions appear similar to the 1963 and 1968 photographs. Study Area 1 appears to have been paved for parking use.

<u>1993, 1998 Photographs</u> – Study Areas 1 and 2 conditions appear similar to the 1974 and 1982 photographs. The portion of the parent parcel immediately west of Study Area 2 appears to be undergoing development into a parking area.

<u>2005, 2009, 2010, 2012 Photographs</u> – Re-paving activities are apparent at Study Area 1. Study Area 2 is used trailer parking with conditions generally reflecting current conditions.

#### 3.2.3 Fire Insurance Maps

EDR prepared a Sanborn Fire insurance map search for the Study Area and surrounding properties. We reviewed maps reported for 1927, 1950, 1953, 1956, 1961 and 1969. The maps listed were blank within the bounds of Study Areas 1 and 2.

#### 3.2.4 City Directory

City Directories, published since the 18th century for major towns and cities, lists the name of the resident or business associated with each address. A city directory search conducted by EDR is located in Appendix F. The listings found for 2495 South Delaware Street are listed in Table 3.1.4-1.

YEAR	LISTINGS
2013	Butler Amusements Inc., Jockey Club, Ovations Fanfare, San Mateo County Event Center, Vitamix
2003	Canvas Collectibles Inc., Deejohns Christmas Trees, Ovations, San Mateo County Expo Center
1999	Deejohns Christmas Trees, San Mateo County Exposition Center, Sodexho
1995	Deejohns Christmas Trees, Fine Host Corp.
1992	Deejohns Christmas Trees, Fine Host Corp., San Mateo Exposition
1985	San Mateo County Fair Center, San Mateo County Fairgrounds, San Mateo County Fair & Exposition
1980	Araserv S Mt Fairground, San Mateo County Fair & Exposition
1977	San Mateo County Fair & Exposition
1970	Convention Assn, Peninsula Art Assn, Peninsula Model Railroad, San Mateo County Fair & Convention, San Mateo County Fairgrounds

#### TABLE 3.2.4-1: City Directory Listings

#### 3.3 ENVIRONMENTAL RECORD SOURCES

EDR performed a search of federal, tribal, state, and local databases regarding the parent parcel of the Study Area and nearby properties. Details regarding the databases searched by EDR are provided in Appendix A. A list of the facilities documented by EDR within the approximate minimum search distance of the parent parcel of Study Areas 1 and 2 is provided below.

#### 3.3.1 Standard Environmental Records

#### 3.3.1.1 Parent Parcel of Subject Study Areas

The following databases includes facilities listed on the Standard Environmental Record sources. The listed facilities are associated with the parent parcel and are located outside of Study Areas 1 and 2.

Based on the distances to the identified database sites, regional topographic gradient, and the EDR findings, it is unlikely that the above database sites pose an environmental risk to Study Areas 1 and/or 2.

Two of three unique cases listed under the "Orphan Summary" list appear to be located beyond the ASTM recommended radius search criteria. The third unique orphan summary case listed as an RGA LUST case is Honda of San Mateo with an associated address of 101 25<sup>th</sup> Avenue. The same site was listed as a LUST site under the mapped sites summary and would not be anticipated to pose an environmental risk to Study Areas 1 or 2.

#### 3.4 **REGULATORY AGENCY FILES AND RECORDS**

The following agencies were contacted pertaining to possible past development and/or activity at the parent parcel of Study Areas 1 and 2.

- City of San Mateo Building Department
- City of San Mateo Fire Department
- City of San Mateo Public Works Department
- San Mateo County Department of Environmental Health
- San Mateo County Assessor's Office
- California Department of Forestry and Fire Protection

<u>City of San Mateo Building Department</u> – The City of San Mateo Building Department provided building permit records. Relevant records included permit applications for the installation and repair of underground storage tanks and above ground storage tanks located on the parent parcel, outside of Study Areas 1 and 2. Records reviewed included the following:

- Building permit application dated June 11, 1997 for the installation of an above-ground gasoline tank for motor vehicle fuel.
- Building permit application dated April 30, 1997 for the removal of an underground fuel tank.

<u>City of San Mateo Fire Department</u> – The City of San Mateo Fire Department provided permit records. A summary of the relevant records is below. The documented facilities are outside of Study Areas 1 and 2.

- Permit issued for removal of one (1) UST on April 17, 1997.
- Four (4) permit applications for one (1) 2,500-gallon propane tank truck to be stored at San Mateo County Fairgrounds dated April 11, 1986, April 24, 1987, April 27, 1988 and April 3, 1990.
- Permit application for installation of one (1) 1,000-gallon UST dated December 3, 1980.

<u>City of San Mateo Public Works Department</u> – The City of San Mateo Public Works Department provided records for our review. Relevant, documented facilities are outside of Study Area 1 and 2 and included the following:

• Drawing titled "Gasoline Storage Tank and Pump Installation" for a 1,000-gallon-capacity fiberglass tank dated December 3, 1980.

<u>San Mateo County Department of Environmental Health</u> – We reviewed documentation related to hazardous materials provided by the San Mateo County Department of Environmental Health. We reviewed records pertaining to a LUST located within the parent parcel and outside of Study Areas 1 and 2. A summary of the information contained in a San Mateo County Groundwater Protection Program Closure Memorandum dated January 28, 2002 pertaining the LUST case is provided below.

• Tank (UST) containing gasoline was removed from the parent parcel of Study Areas 1 and 2. The UST was located approximately 650 feet east of Study Area 1 and 850 feet northwest

of Study Area 2. At the time of removal, soil and groundwater samples were found to contain petroleum hydrocarbons. Monitoring wells were constructed and sampled quarterly. Groundwater flow direction was determined to be directed north. Based on a review of the documents provided, the final quarterly sampling event was conducted in summer 2001 and detected 52 micrograms per liter ( $\mu$ g/L) TPH-g, 0.6  $\mu$ g/L benzene, and 4  $\mu$ g/L MTBE. Based on the results of the sampling event, the San Mateo County closure memorandum states the groundwater plume appears to be local and is stable.

<u>San Mateo County Assessor's Office</u> – We spoke with a representative at the San Mateo County Assessor's Office and they confirmed the APN of 040-030-220 and associated address belongs to the parent parcel of Study Areas 1 and 2.

<u>California Department of Forestry and Fire Protection</u> – A representative of the California Department of Forestry and Fire Protection was contacted for a file review; however, we did not receive files for review prior to publishing this report

We also reviewed GeoTracker, a website maintained by the State of California, Water Resources Control Board, and EnviroStor, a website maintained by the State of California, Department of Toxic Substances Control for information regarding Study Areas 1 and 2. The parent parcel of Study Areas 1 and 2 was listed on GeoTracker as a LUST cleanup site. The case, which is listed as closed as of September 30, 2002, is discussed above in section 3.4. The Study Areas are not listed within either database.

## 4.0 SITE RECONNAISSANCE

#### 4.1 METHODOLOGY

ENGEO conducted a reconnaissance of Study Areas 1 and 2 on February 2, 2017. The reconnaissance was performed by Yanet Zepeda, a Staff Engineer of ENGEO. The Study Areas were viewed for hazardous materials storage, superficial staining or discoloration, debris, stressed vegetation, or other conditions that may be indicative of potential sources of soil or groundwater contamination. The areas were also checked for evidence of fill/ventilation pipes, ground subsidence, or other evidence of existing or preexisting underground storage tanks. Study Area 2 contained one administrative office trailer for which access was not provided during our site reconnaissance. We do not consider this a significant data gap. Photographs taken during the site reconnaissance are presented in Figure 5.

#### 4.2 GENERAL SITE SETTING

Study Area 1 and Study Area 2, respectively, occupy portions of the City of San Mateo Exposition Center. The topography of Study Areas 1 and 2 is relatively level. Study Area 1 is currently occupied by an asphalt-paved parking lot. Study Area 1 is accessible by two site entrances located on South Delaware Street and Saratoga Drive. Trees, bushes, and grasses vegetate the perimeter of Study Area 1 to the north, west, and east. Study Area 2 is currently occupied by an unpaved parking yard. Study Area 2 is accessible via the site entry on Saratoga Drive located on the northeastern portion of the parent parcel. The parking yard is populated by buses, trailers and recreational vehicles of various sizes. One administrative office trailer is situated on the southwestern corner of Study Area 2.

#### 4.3 EXTERIOR OBSERVATIONS

Structures. One administrative office trailer structure was observed within Study Area 2.

<u>Hazardous Substances and Petroleum Products in Connection with Identified Uses</u>. No hazardous substances were observed within Study Areas 1 and 2 at the time of our reconnaissance.

<u>Storage Tanks</u>. No above-ground storage tanks or evidence of existing underground storage tanks was observed during the site reconnaissance.

<u>Odors</u>. No odors indicative of hazardous materials or petroleum material impacts were noted at the time of the reconnaissance.

<u>Pools of Potentially Hazardous Liquid</u>. No pools of potentially hazardous liquid were observed within the Study Area at the time of our reconnaissance.

Drums. No drums were observed on the Study Areas at the time of the reconnaissance.

<u>Polychlorinated Biphenyls (PCBs)</u>. No PCB-containing materials, including transformers, were observed within the Study Areas during the reconnaissance.

<u>Pits, Ponds and Lagoons</u>. No pits, ponds or lagoons were observed within Study Areas 1 and 2 at the time of our reconnaissance.

<u>Stained Soil/Pavement</u>. No stained soil or pavement was observed within Study Areas 1 and 2 at the time of our reconnaissance.

<u>Stressed Vegetation</u>. No signs of stressed vegetation were observed the within Study Areas 1 and 2 at the time of our reconnaissance.

<u>Solid Waste/Debris.</u> One active yard waste bin was observed within Study Area 2, located adjacent the administrative office trailer. Additionally, piles of construction materials including wood, tires and steel were observed within Study Area 2.

Stockpiles/Fill Material. No stockpiles or fill material was observed during the reconnaissance.

<u>Wastewater.</u> No wastewater conveyance systems were observed at Study Areas 1 and/or 2 during the reconnaissance.

Wells. No wells were found within the Study Areas during our site reconnaissance.

<u>Septic Systems</u>. No septic systems were found within the Study Areas during our site reconnaissance.

#### 4.4 INTERIOR OBSERVATIONS

The administrative office trailer could not be accessed during our reconnaissance.

#### 4.5 ASBESTOS-CONTAINING MATERIALS AND LEAD-BASED PAINT

An asbestos and lead-based paint survey was not conducted as part of this assessment. The only structure is the administrative office trailer, and it is unlikely that the trailer contains asbestos-containing materials or lead-based paint.

#### 4.6 INDOOR AIR QUALITY

An evaluation of indoor air quality, mold, or radon was not included as part of the contracted scope of services. The California Department of Health Services has conducted studies of radon risks throughout the state, sorted by zip code. Results of the studies indicate that 68 tests were conducted within the Study Area zip code, with one test exceeding the current EPA action level of 4 picocuries per liter [pCi/L]<sup>1</sup>).

In accordance with ASTM E2600-10 (Tier 1) (*Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*); There are no potential petroleum hydrocarbon sources for vapor intrusion within 1/10 mile of Study Areas 1 and 2 and one potential volatile organic compound (VOC) source within 1/3 mile of the Study Area. It is our opinion that the identified site does not represent a vapor intrusion concern for Study Area 1 or 2.

## 5.0 INTERVIEWS

Ms. Dana Stoehr, Key Site Manager of the City of San Mateo Exposition Center, completed environmental site assessment questionnaires pertaining to Key Site Manager and Clientrelated applicable environmental information regarding the Site. In the questionnaires, Ms. Stoehr did not identify potential environmentally related issues with the Site. However, Ms. Stoehr did acknowledge an underground storage tank had been previously present within the parent parcel of the Site. The questionnaires are presented in their entirety in Appendix G. A summary is provided below.

Ms. Stoehr is unaware of commonly known, reasonably ascertainable, or specialized knowledge indicative of releases or threatened releases that is material to the potential presence of Recognized Environmental Conditions.

## 6.0 EVALUATION

#### 6.1 **FINDINGS**

The reconnaissance and records research did not find documentation or physical evidence of soil or groundwater impairments associated with the current or past use of Study Areas 1 and 2. A review of regulatory databases maintained by county, state and federal agencies found no documentation of hazardous materials violations or discharge on Study Areas 1 and 2. No documented soil or groundwater contamination associated with abutting properties was found from the records research that would be expected to impact Study Areas 1 or 2.

<sup>&</sup>lt;sup>1</sup> California Department of Health Services – Division of Drinking Water and Environmental Management – Radon (<u>http://www.cdph.ca.gov/HealthInfo/environhealth/Documents/Radon/CaliforniaRadonDatabase.pdf</u>).

#### 6.2 OPINIONS AND DATA GAPS

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC. The following data gaps were identified:

- A Preliminary Title Report for the parent parcel of the Study Area was not provided for our review prior to the publication of this report.
- The interior of the administrative office trailer on Study Area 2 could not be accessed at the time of site reconnaissance.
- We did not receive files from the California Department of Forestry and Fire Protection prior to the publication of this report.

The data gaps identified during this process do not affect the conclusions as to the presence or lack of presence of RECs within the Study Areas.

#### 6.3 CONCLUSIONS

The study included a review of local, state and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps and physical setting sources; a reconnaissance of Study Areas 1 and 2 to review site use and current conditions to check for the storage, use, production or disposal of hazardous or potentially hazardous materials.

The site reconnaissance and records review did not find documentation or physical evidence of soil or groundwater impairments associated with the use or past use of Study Areas 1 and 2. A review of regulatory databases maintained by county, state, tribal, and federal agencies found no documentation of hazardous materials violations or discharge on Study Areas 1 and 2 and did not identify contaminated facilities within the appropriate American Society for Testing and Materials (ASTM) search distances that would reasonably be expected to impact the Study Area.

Based on the findings of this assessment, no Recognized Environmental Conditions (RECs), controlled RECs, or Historical RECs are identified for Study Areas 1 and/or 2.

Based on the review of regulatory databases and site reconnaissance, we present information on a feature of potential environmental concern that was contained in the databases related to the Study Areas. This feature was not considered to be an REC. We briefly discuss the feature below.

• The parent parcel (040-030-020), outside of Study Areas 1 and 2 is associated with a former LUST case. The LUST case is located approximately 650 feet east of Study Area 1 and 850 feet northwest of Study Area 2, was removed in 1997 (Figure 2). The San Mateo County Groundwater Protection Program issued a Closure Memorandum dated January 28, 2002 for the LUST case. It is our opinion that the risk of environmental impact to Study Areas 1 and 2 is low.

ENGEO has performed a phase I environmental site assessment in general conformance with the scope and limitations of ASTM E1527 of approximately 1 and 2.2-acre portions of the parent parcel identified by Assessor's Parcel Number (APN) 040-030-220, San Mateo, California,

Study Area 1 and Study Area 2. Any exceptions to, or deletions from, this practice are described in Section(s) 1.7 and 6.2 of this report.

ENGEO recommends no further environmental studies at this time.

We understand that material offhaul may occur as part of future development. It may be prudent to perform a preliminary material offhaul screening program with laboratory analysis to evaluate potential offhaul disposal and reuse options.

### **EXECUTIVE SUMMARY**

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/12/2016 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

### State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

### State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 86 LUST sites within approximately 0.5 miles of the target property.

SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the SLIC list, as provided by EDR, has revealed that there are 4 SLIC sites within approximately 0.5 miles of the target property.

### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

### Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 26 SWEEPS UST sites within approximately 0.25 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/12/2016 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
PACIFIC BELL	2164 PALM AVENUE	W 1/8 - 1/4 (0.129 mi.)	G60	101

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/15/2016 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, and dated 09/02/2016 has revealed that there is 1 DRYCLEANERS site within approximately 0.25 miles of the target property.

BAY MEADOWS RACING A Facility Id: 15016	2600 SO DELAWARE	0 - 1/8 (0.000 mi.)	B19	30

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2015 has revealed that there are 4 HAZNET sites within approximately 0.001 miles of the target property.

#### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

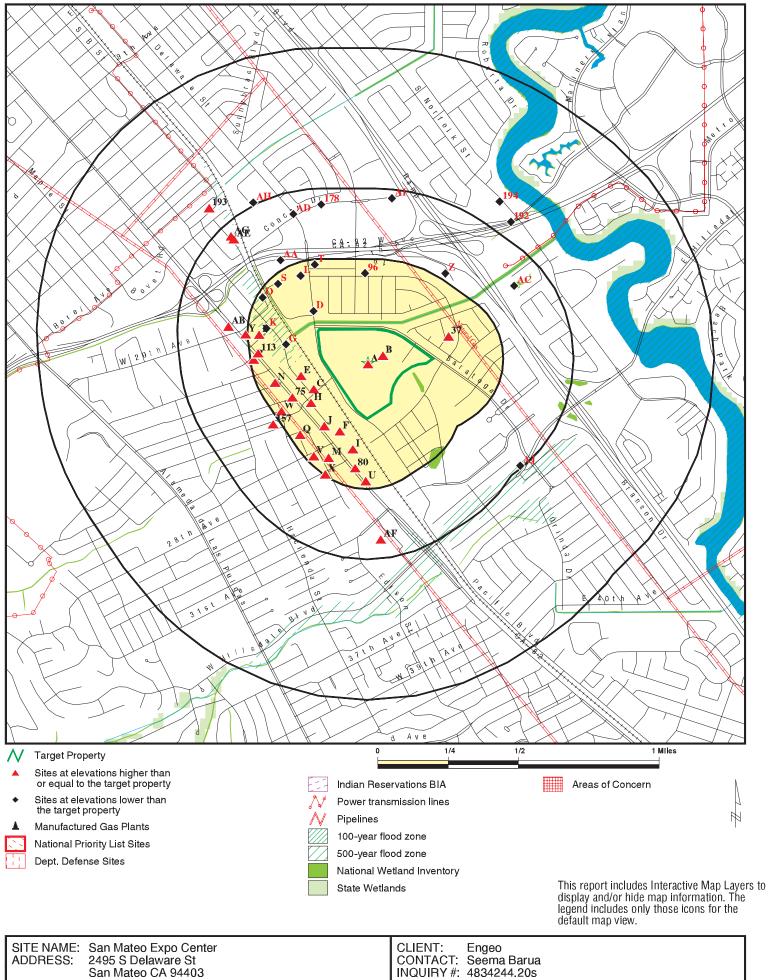

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Plus occupies the property bordering the site to northwest. El Camino Real borders the site to the southwest, and CalTran right-of way borders the site to the northeast. Beyond the CalTran right-of-way, to the north and northeast, lays Bay Meadows Race Track and the San Mateo County Fairgrounds. The GeoTracker database indicates there was a release from a former UST located at the property immediately northwest of the site, at 2745 El Camino Real. The environmental case for the site is closed, although residual petroleum hydrocarbon and methyl tertiary butyl ether (MtBE) concentrations remain. Two 10,000-gallon and one 8,000-gallon capacity single-wall fiberglass underground storage tanks (USTs) were removed from the site on November 2, 2000. The work was performed in accordance with a Permit to Close Underground Hazardous Materials Storage Tank dated October 2 5, 2000, and an Inspection Permit dated October 17, 2000, issued by the San Mateo County Division of Environmental Health (SMCo) and the City of San Mateo Fire Department (SMFD), respectively. Representatives of both agencies were on site to witness UST removal activities. Prior to removing the USTs, a hot water pressure washer was used to wash the interior surface of each tank. Approximately 100 gallons of rinseate was removed from the USTs and disposed of by Clearwater Environmental Management, Inc. of Union City, California. John's Excavating of Santa Rosa, California performed UST removal activities. Once removed, the USTs were transported under a Uniform Hazardous Waste Manifest, and disposed of at ECI, Inc. in Richmond, California. The USTs did not contain any visible exterior holes or deterioration, and appeared to be intact. Soil and crushed rock stockpiled during the UST removal activities were placed back into the excavation. A total of eleven discrete soil samples were collected from the undisturbed soil beneath the USTs and associated dispensing facilities. Six soil samples were collected from beneath the USTs, four soil samples were collected from beneath the pump dispensers, and one soil sample was collected from beneath the product piping. One grab groundwater sample was collected from the UST excavation. Additionally, two four-point composite soil samples were collected from the soil stockpile. TPHg, benzene, and MtBE were detected in soil samples and in the groundwater sample. TPHg and benzene were detected in one of six soil samples collected from beneath the USTs at concentrations of 110 parts per million (ppm) and 0.20 ppm, respectively. Low concentrations of toluene, ethylbenzene, and xylenes were also detected in the soil sample from beneath the USTs. MtBE was detected in two of six samples collected from beneath the USTs; the maximum concentration was 0.80 ppm. TPHg was detected in four of five samples retrieved from beneath the pump dispensers and product piping, and benzene was detected in two of five samples. The TPHg concentrations ranged from 26 ppm to 270 ppm, and the maximum benzene concentration was 1.1 ppm. Low concentrations of toluene, ethylbenzene, and xylenes were also detected. MtBE was detected in two of five soil samples collected from beneath the pump dispensers and product piping; the maximum concentration was 3.4 ppm. The presence of MtBE was confirmed by EPA Method 8260B. TPHg and benzene were detected in both stockpile samples at maximum concentrations of 550 ppm and 1.5 ppm, respectively. The grab groundwater sample contained 22,000 parts per billion (ppb) TPHg and 160 ppb benzene. The cause of the release is unknown; the USTs appeared to be intact upon removal. Analytical data for soil samples collected during removal of the USTs suggest that gasoline was predominantly released in the area of the pump dispensers and product

EDR ID Number Database(s) EPA ID Number

#### TWENTY-EIGHTH AVENUE CAR WASH (Continued)

#### S103894162

piping. Gasoline may also have been released as a result of overfilling the USTs. The duration of the release(s) and volume(s) are unknown; there are no records regarding product reconciliation or testing of the USTs and related systems. The USTs, dispensers and related piping were removed; therefore, there are no primary sources of petroleum hydrocarbons or MtBE at the site. Site characterization activities documented in available reports and letters are listed below in chronological order. June 2000 - A Phase I1 environmental assessment was conducted at the site on June 9, 20002. The assessment was conducted as part of the property transaction process; the objective was to disclose whether operations at the site had resulted in a release of petroleum hydrocarbon product to the subsurface. Low levels of TPHg, diesel range hydrocarbons (TPHd), and ethyl benzene were detected in soil samples collected from approximately 10 feet below ground surface (bgs) at four separate locations. TPHg were detected in two samples at concentrations of 7.08 and 22.7 ppm. TPHd was detected at 1.6 ppm in one sample and ethyl benzene was detected in one sample at 0.372 ppm. There was no graphic documentation showing the sample locations; however, a narrative indicates that two samples were collected in the area of USTs and two were located northeast of the USTs. The author of the Phase I1 report concluded that there was evidence of only localized and limited impact to soil in the area of the USTs, and there was no basis for supposing groundwater contamination existed on site. August 2000 - A geo-probe investigation was conducted on August 29, 2000; however, there was no report generated for this investigation. Four geo-probe borings were installed, field sheets indicate that at the time of the investigation the groundwater table was between 25 and 32 feet bgs, except in one case where the groundwater table was measured at 9 feet bgs. It was reported that the maximum concentrations of TPHg, benzene, and MtBE detected in groundwater samples were 1,400 ppb, 8.9 ppb, and 3 10 ppb, respectively. November 2000 - Three USTs were removed from the site on November I and 2, ZOO04. The final limits of the excavation left after removal of the USTs was approximately 30 feet by 35 feet by 12 feet deep; perched groundwater was observed at the bottom of the tank pit. Chemical analyses of soil and groundwater samples collected as part of UST removal indicated that a release of gasoline had occurred. January 2001 - RRM submitted a site assessment and corrective action work plan for the site to SMCo on January 18, 20015. The work plan described work proposed to determine the lateral and vertical extent of petroleum hydrocarbons in soil and groundwater, and to remediate soil impacted with MtBE. RRM proposed to install four groundwater-monitoring wells, collected and analyze groundwater samples, and excavate MtBE-affected soil located beneath the dispenser area. The goal of excavation was to remove soil with MtBE levels that exceed 1 ppm. SMCo approved the work plan in a letter dated January 23, 2001. April 2001 - On April 18, 2001, approximately 60 cubic yards of soil were removed from the area of the former dispensers6. The final limits of the excavation were 8 feet by 16 feet by 12 feet deep. Excavated soil was loaded directly onto container trucks and disposed of at Allied Waste's Forward Landfill facility in Manteca, California under non-hazardous waste manifest. Soil samples were collected during digging from the bottom of the excavation at 4, 8, 10, and 12 feet bgs. The excavation pit was backfilled with clean imported fill. Analyses of soil samples collected from the excavation revealed that TPHg was present all samples. The maximum TPHg concentration, 470 ppm, was detected in the

EDR ID Number Database(s) EPA ID Number

#### TWENTY-EIGHTH AVENUE CAR WASH (Continued)

#### S103894162

sample from 8 feet bgs. Benzene was detected in three of four samples; the maximum benzene concentration, 2.4 ppm, was also detected in the sample from 8 feet bgs. MtBE was detected in two of four samples. The maximum MtBE concentration, 5.6 ppm, was detected in the sample from 1 0 feet bgs. On April 26, 2001, RRM drilled and installed four groundwater-monitoring wells, designated MW-1 through MW-4. The wells were installed to a maximum depth of approximately 30 feet bgs. We11 locations and were selected to provide sufficient petroleum hydrocarbon plume definition cross gradient and down gradient of the former UST and pump dispenser locations. At the request of the SMCo, Well MW-2 was installed approximately 40 feet southeast of its proposed location to intercept groundwater beneath the pump dispenser excavation area. The wells were developed, gauged, and sampled on April 30, 2001. TPHg was detected in three of eight soil samples collected during installation of the monitoring wells. Concentrations ranged from 130 ppm in the sample collected from Well M W-2 at 1 5 feet bgs to 600 ppm in the sample collected from Well MW-1 at 10 feet bgs. Benzene was detected in six of eight samples; the maximum concentration, 2.4 ppm, was detected in a sample from We11 MW- I collected at 10 feet bgs. MtBE was detected in four of eight soil samples. The maximum MtBE concentration, 0.27 ppm, was detected in a soil sample from Well MW-3 collected at 15 feet bgs. Groundwater elevations at wells MW- I through MW-4 ranged from 9.02 feet above mean sea level (msl) to 10.60 feet above msl. The groundwater flow direction was to the northeast at an approximate gradient of 0.007 foot/foot. TPHg was detected at all the wells; the maximum concentration, 18,000 ppb, was detected at Well MW-3. The TPHg results reported for samples from wells MW-2 and MW4 were with within the quantification range, but the chromatographic pattern was not typical of fuel. Benzene was detected in wells MW-1 and MW-3 at concentrations of 98 ppb and 350 ppb, respectively. MtBE was detected at all the wells using EPA Method 8260B; the maximum concentration, 17,000 ppb, was detected in a sample from MW-3. Tert-amyl methyl ether (TAME) was detected at wells MW-2, MW-3, and MW4 at 450 ppb, 3,200 ppb and 240 ppb, respectively. The highest concentrations of TPHg, benzene, and MtBE in groundwater were detected at Well MW-3, located at the southwest edge of the former UST complex. June 2002 -In a work plan submitted to SMCo, dated June 24, 2002, RRM proposed to install up to nine soil borings to collect soil and groundwater samples with the objectives of delineating the extent of dissolved hydrocarbons in groundwater and determining whether significant soil impact remained in the area of the former dispensers. An addendum to the work plan, dated August 2, 2002, indicated that data for the adjacent site at 2745 El Camino Real would be used in the evaluation in lieu of installing one offsite boring. SMCo approved the work plan in a letter dated June 26, 2002. December 2002 - On December 1 I, 2002, eight direct-push borings, designated SB- I through SB-8, were installed at the site7. Soils logged during [he investigation consisted of inter-bedded clayey sand, sandy clay, and sand with gravel to 26 feet bgs, the maximum depth explored. Groundwater was encountered between approximately 1 1.5 and 22 feet bgs. At the time of the study, the estimated groundwater flow direction was north at an approximate gradient of 0.02 foot per foot. TPHg was detected in soil samples at 5 and 10 feet bgs from Boring SB-3 at 66 and 480 ppm, respectively. The sample From Boring SB4, collected at 1 0 feet bgs, contained 810 pprn TPHq. Benzene and MtBE were not detected in any of the soil samples analyzed. Groundwater samples were collected from

EDR ID Number Database(s) EPA ID Number

#### TWENTY-EIGHTH AVENUE CAR WASH (Continued)

#### S103894162

all eight borings. TPHg concentrations ranged from 550 ppb at Boring SB-8 to 18,000 ppb at Boring SB-4. For the groundwater samples from borings SB-2, SB-3, and SB-4, the laboratory noted that while results were in the quantitative range for TPHg, the chromatographic pattern did not match the pattern for gasoline. Benzene was detected in groundwater samples from borings SB-1, SB-4, and SB-5 at concentrations of 72, 75, and 1 1 ppb, respectively. MtBE was detected in all eight groundwater samples collected at concentrations ranging from 30 ppb in the sample from Boring SB-8 to 10,000 ppb in the sample from Boring SB-4. Tert-amyl methyl ether (TAME) was detected in samples collected from borings SB-2 through SB-7 at concentrations between 22 and 4,500 ppb. RRM concluded that TPHg and MtBE were present in groundwater beneath the northern portion of the site, downgradient of the former pump dispenser area and location of the former USTs. RRM also concluded that petroleum hydrocarbon concentrations in soil were defined vertically at former pump dispenser area and location of the former USTs, and that TPHg benzene, and MtBE affected soil is limited to the onsite source areas. April 2003 - On April 7, 2003, RRM submitted an addendum to the report issued to document the site investigation conducted in December 20028. The addendum provided an evaluation of the dissolved hydrocarbon and MtBE plumes using data from the December 2002 study and groundwater analytical data for the site at 2745 El Camino Real. The addendum also proposed a well survey radius based on the degradation rate and travel time for MtBE. RRM proposed a radius of 3 17 feet from the area of the former pump dispensers. December 2003 -Subsequent to comments by SMCo in a letter dated July 23,2003, RRM revised the proposed well survey radius to encompass an area 1,000 feet downgradient (north) of the former pump dispensers, and 500 feet cross gradient (east and west) of the former pump dispensers. A door-to-door survey was completed between September 29, and October 17, 20039. Well survey fill-in forms were left at properties where interviews were not possible. One groundwater monitoring well was located within the survey area, at 2727 El Camino Real. It was also noted that there were no residential properties located within the survey area. July 2004 - Off-site grab groundwater samples were collected by RRM on June 29, 2004 from three direct-push borings. The soil borings, designated SB-9 through SB-11, were located downgradient from the site at Bay Meadows Race Track. The groundwater flow direction at the time of the study was to the northeast at an estimated gradient of 0.010 foot per foot. TPHg was detected in groundwater samples from all the wells and Borings SB-9 and SB-I 0 at concentrations from 5 1 ppb at Boring SB-9 to 3,100 ppb at Well MW-2. The TPHg values for wells MW-2 through MW-4 were elevated due to concentrations of MtBE. Benzene was detected only at We11 MW-I at 63 ppb. MtBE was detected at all the wells and borings. Concentrations of MtBE ranged from 3.7 ppb at Boring SB-I 1 to 4,800 ppb at Well MW-2. TAME was detected at wells MW-2 through MW-4 and at borings SB-9 and SB-I0 at concentrations ranging from 9.8 ppb at Boring SB-9 to 990 ppb at Well MW-2. April 2001 to March 2005 -Groundwater monitoring has been conducted guarterly at wells MW-I through MW-4 since 2001.

#### Environmental Interest/Information System HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

UST was removed in 1986 along with the other USTs which were replaced at the same locations. The diesel tank was not replaced. The application for UST removal in 1986 indicated that the existing USTs were installed in 1956. The station was renovated in June and July 1991. A former dispenser pump island previously located in the western portion of the site was removed during site renovation. Kaprealian Engineering, Inc. (KEI) on May 8, 1986, observed the removal of four USTs; two 6,000-gallon gasoline tanks, one 4,000-gallon gasoline tank, and one 280-gallon used oil tank. One of the 6,000-gallon regular fuel tanks was reported to have been ruptured at one end. Four side-wall excavation soil samples were collected and analyzed. The highest TPH-G concentration was in the soil sample taken from the northeast wall of the excavation (1,900 parts per million ppm). Two groundwater samples were taken from the excavation and composited in the laboratory. The groundwater samples contained total petroleum hydrocarbons concentrations at 9,900 parts per billion (ppb) and benzene of 130 ppb. KEI on October 27, 1986 observed the removal of one UST, a 4,000-gallon diesel fuel tank located in the southern portion of the site behind the station building. Visual inspection of the tank indicated no evidence of excessive corrosion or leaks. Two soil samples were collected from the soil removed from the excavation. No analytes were detected in either samples. On November 14, 1986, three aroundwater monitoring wells (MW-1 through MW-3) were installed in order to define the extent of petroleum hydrocarbons detected during the UST removals. The 2-inch wells were placed adjacent to the fuel USTs. Well MW-1 was constructed with a screen interval of 7 to 35 feet below ground surface (bgs) and wells MW-2 and MW-3 were constructed with a screen interval of 7 to 25 feet bgs. Soils encountered during drilling varied from sandy to silty clay (Unified Soil Classification Symbol CL) from 3 to 25 feet bgs overlying native organic rich clay (CH) to the total depth explored of 35 feet bgs. Groundwater was first encountered in the borings at depths of 8.5 to 9.5 feet bgs. A second saturated zone was encountered at 13 feet and 25.5 feet bgs. Total petroleum hydrocarbons (TPH) were detected in a soil sample from the site boring for well MW-1 at 150 ppm. No soil sample was collected from the boring for the well MW-2. TPH was not detected in the soil sample from the boring for well MW-3. Groundwater samples collected from the monitoring wells were found to not contain any petroleum hydrocarbons above the laboratory reporting limit (LRL). On August 27 and 28, 1990, three additional wells (MW-4 through MW-6) were installed onsite. The wells were placed in the east and southeastern portion of the property in what was thought to be the downgradient groundwater flow direction. Wells MW-4, MW-5, and MW-6 were constructed with a screen interval of 4 to 19 feet bgs. Soils encountered during the investigation varied from a fill material consisting of sand and gravel ranging in depth from 4 to 6 feet bgs overlying clay (CL) ranging in depth from 5 to 18 feet bgs overlying a clayey sand (SC) and sandy clay (CL) ranging in depth from 18 to 20.5 feet bgs. In MW-4, the clayey sand (SC), sandy clay (CL) were underlain by a clay (CL). The total depth explored during this investigation was 20.5 feet bgs. Groundwater was first encountered in the borings at depths ranging from 7 to 8 feet bgs. On September 6, 1990, groundwater samples were collected from all six groundwater monitoring wells (MW-1 through MW-6). The samples were analyzed for total petroleum hydrocarbons as gasoline (TPH-G), total petroleum hydrocarbons as diesel (TPH-D), total oil and grease (TOG), benzene,

#### MOBIL 10-FLN / BP #11196 (Continued)

#### S116282743

toluene, ethylbenzene, and xylenes (BTEX), halogenated volatile organic compounds (HVOCs), and total lead. Petroleum hydrocarbons were concentrated in well MW-6 located immediately east of the fuel USTs. TPH-G were detected at 4,800 ppb and TPH-D at 7,500 ppb. The HVOC 1,2-dichloroethane (1,2-DCA) was detected in samples from wells MW-3, MW-4, and MW-5 at concentrations up to 3.5 ppb. TOG was detected in samples from wells MW-1, MW-5, and MW-6 concentrations at up to 14,000 ppb (MW-5). MW-5 is located near the used oil tank in the southern portion of the site. On August 6 and 13, 1991, four monitoring wells (MW-7 through MW-10) were installed around the perimeter of the site. Wells MW-7 through MW-9 were constructed of 4-inch diameter PVC with a screen interval of 4 to 15 feet bgs and well MW-10 was constructed of 2-inch diameter PVC with a screen interval of 3.5 to 16.5 feet bgs. Soils encountered varied from a fill material ranging in depth from 1 to 3 feet bgs underlain by clay (CL) and clayey sand (SC) to the total depth explored of 16.5 feet bgs. Groundwater was first encountered in the borings at depth of approximately 6 feet bgs. On March 24, 2000, two monitoring wells (MW-11 and MW-12) were installed. Well MW-11 was located in what was thought to be downgradient of source areas in the northwest corner of the site and well MW-12 off-site to the north across 19th Avenue. Well MW-11 was constructed with a screen interval of 4 to 19 feet bos and well MW-12 was constructed with a screen interval of 5 to 20 feet bgs. Soils encountered included silt (ML), clayey silt (ML), sandy silt (ML), silty sand (SM), gravelly sand (SW), and sandy gravel (GW) to a total explored depth of 21.5 feet bgs. Groundwater was first encountered in the borings at depths ranging from 14 to 19.5 feet bgs. Constituents analyzed from soil and water samples collected during the installation of MW-12 showed concentrations below the LRL. On March 14, 1991, HETI conducted a pumping test utilizing the four-inch diameter monitoring well MW-4 located adjacent to the fuel USTs. Well MW-4 is 19 feet deep and screened from 4 to 19 feet bgs. The screened interval is opposite primarily clay with an approximately 4-foot layer of clayey sand. Well MW-4 was selected as the pumping well because it was located in the general center of the dissolved hydrocarbon plume. The pump test duration was approximately eight hours. The well was pumped at a flow rate of 2.9 gallons per minute (gpm). This pumping rate was inconsistent with soil types opposite the well screen (clay and sandy clay) that should have been less than 1 gpm. Drawdown was detected in well well MW-2 (0.23 feet) located approximately 40 feet northeast of the pumping well. Drawdown was not detected in well MW-5 located approximately 50 feet southwest of the pumping well. The hydraulic conductivity value was calculated to range from 49 to 566 gallons per day per foot squared (gpd/ft2) depending on the analytical method used to evaluate the data. These values convert to 2.81 x 10-3 to 2.67 x 10-2 centimeters per second. These values are typical for clean sand which is inconsistent with the boring log data. The cone of depression was estimated at approximately 90 feet along its long axis. On April 17 and 23, 1991 KEI collected soil samples from product line trenches excavated during routine dispenser modifications; samples P1 through P9, SW1P, SW2P, SW-1 and SW-2. A total of thirteen soil and one groundwater samples were collected. The highest concentrations in soil of petroleum hydrocarbons were reported in a sample from the southern sidewall of the dispenser excavation area (SW2, TPH-G at 4,200 ppm). The highest TPH-G concentration was reported in sample trench sample P4 at 1,800 ppm. The area of sample P4 was over-excavated to a depth

#### S116282743

of 6 feet where groundwater was encountered. The groundwater sample (W1) contained a concentration of 5,200 ppb TPHG. Site borings (THP-1 through THP-4) were advanced in 1994 as part of a baseline assessment report. Borings were labeled HP-1 through HP-4 on boring logs and figures. Borings were drilled in the northern portion of the site to total depth of approximately 10 feet below ground surface (bgs) in order to explore the upper fine-grained deposits. HP-3 and HP-4 were advanced to 16 and 15 feet bgs, respectively, in order to collect groundwater samples in the lower coarse grained deposits. Soils encountered during this investigation varied from fill materials to depths ranging from 2.5 to 6 feet bgs overlying clayey sand (SC) and sandy clay (CL) ranging in depth from 6.5 to 7.5 feet bgs overlying clay (CL) to the total depth explored of 10 feet bgs. Groundwater was encountered in each boring and a grab water sampled collected from the uncased borehole. TPH-G was detected in boring TPH-1 at a concentration of 6,500 ppb, THP-2 at 110,00 ppb and 85,000 ppb in THP-3. THP-2 and THP-3 were located north of the dispenser islands. The magnitude of these reported grab concentrations is guestioned based on historic data. On November 1995, Alisto Engineering Group (Alisto) hand augured borings B-1 through B-3, B-4A, B-4B, B-5A, and B-5B. Borings were completed to depths ranging from 1.5 feet to 5.5 feet bgs in order to collect samples from the near surface fill and clav deposits. Soil types encountered consisted of imported fill (gravel) over native gray silty clay. TPH-G was detected in the 4.5 to 5-foot samples of borings B-2 and B-3 at a concentration of 1,500 milligrams per kilogram (mg/kg). In October 2007, ATC Associates, Inc. (ATC) performed a baseline assessment of the property at the time of a possible real estate transfer. The data reported was not requested or required by a regulatory agency. ATC collected post-purge groundwater samples from MW-1 through MW-9 to generate a baseline assessment of property conditions. Maximum concentrations of TPH-G (130 micrograms per Liter ["g/L]) and methyl tertiary-butyl ether (MTBE) (14 "g/L) were reported in the samples collected from MW-4 and MW-1, respectively. The maximum concentration of TPH-D (4,000 "g/L) was reported in the sample collected from MW-8. Groundwater monitoring has been performed since August 1986 (wells MW-1 through MW-3). Wells MW-1 is screened from 7 feet to 35 feet bas and MW-2 and MW-3 are screened from 7 feet to 25 feet bgs, MW-4 through MW-6 and MW-11 are screened from 4 feet to 19 feet bgs, MW-7 through MW-9 are screened from 4 feet to 15 feet bgs, MW-10 is screened from 3.5 feet to 16 feet bgs, MW-12 and MW-16 are screened from 5 feet to 20 feet bgs, MW-13 is screened from 9 feet to 19 feet bgs, MW-14 is screened from 6 feet to 20 feet bgs, and MW-15 is screened from 9.5 feet to 19.5 feet bgs. Depth to groundwater in wells has typically been less than 6 feet below top of casing.

Removal: In 1983, steel fuel underground storage tanks (USTs) west of the station building were removed. New USTs were installed within the southern portion of the site. December 1992 Investigation: In December 1992, RESNA advanced borings B-1 through B-6 (Figure 2), to evaluate for petroleum hydrocarbons in soil and groundwater in the vicinity of the former and existing USTs. Total petroleum hydrocarbons as gasoline (TPHg) was detected in borings B-2, B-3, and B-4 and the highest concentrations was 150 milligrams per kilogram (mg/kg) in boring B-3 at 11.5 feet below grade (fbg). No benzene was detected in soil. The highest petroleum hydrocarbon concentrations detected in groundwater were 31,000 micrograms per liter (gg/L) TPHg and 2,000 %g/L benzene in boring B-4. 1993-1994 UST Removal and Over-Excavation: In November 1993, Golden West Builders demolished the site, including the station building, and removed four USTs (three 10,000-gallon fuel USTs and a 1,000-gallon used-oil UST), fuel product lines, dispenser islands, and two hydraulic hoists. Between November 1993 and May 1994, approximately 2,100 cubic yards of soil were excavated from the site, of which approximately 1,500 cubic yards of soil were transported to a disposal facility. Groundwater was observed at approximately 10.5 fbg during the UST removal activities. Approximately 5,000 gallons of groundwater were pumped from an excavation made in the area of the former used-oil tank, and the water was transported to an appropriate disposal facility. The highest remaining petroleum hydrocarbon concentrations in soil are 3,300 mg/kg TPHg in side wall sample WX-19 and 6 mg/kg benzene in sidewall sample WX-21. The highest concentrations of TPHg and benzene in groundwater were detected in B-4 near the former used oil tank at concentrations of 31,000 gg/L and 2,000 gg/L. July 1995 Investigation: In July 1995, Touchstone drilled borings MW-1, MW-2, MW-3, and B-4 and installed monitoring wells in borings MW-1 through MW-3. Only low concentrations of petroleum hydrocarbons were detected in boring MW-3. 1999-Present Sump Remediation History: In 1999, the City of San Mateo Department of Public Works (CSMDPW) requested that petroleum hydrocarbon-bearing groundwater being discharged from the sump located at 20 East 20th Avenue under CSMDPW Wastewater Discharge Permit #OSB-S be treated prior to discharge. On July 21, 1999, Cambria Environmental Technology, Inc. (Cambria) installed a groundwater treatment system (GWTS). On September 24, 1999, Cambria removed the GWTS after receiving approval from CSMDPW, since concentrations detected in the sump were below discharge concentration limits. Currently, CRA collects required data and submits guarterly compliance sampling reports to the CSMDPW for permit compliance. September 2004 Investigation: On September 23, 2004, Cambria advanced soil borings SB-1 through SB-4, along the eastern property line (Figure 2). Petroleum hydrocarbons were detected in soil from borings SB-1 and SB-3. The highest concentration of TPHg in soil was 370 mg/kg from boring SB-1 at 9 fbg. No benzene was detected in soil. Complete results of this investigation are described in Cambrias March 4, 2005 Subsurface Investigation Report. 2004 Elevator Construction Dewatering and Soil Disposal: On October 8, 2004, Cambria was notified that hydrocarbon impacted groundwaterwas encountered during elevator-shaft construction activities at 20 East 20th Avenue. Cambrias Soil and Ground Water Management Plan, dated October 9, 2004, was prepared to outline a dewatering protocol and groundwater discharge requirements during the elevator shaft construction. Cambria installed a temporary carbon treatment system at the site to allow treatment of water from

#### S103443217

the shaft so that the construction activities could continue. Based on totalizer readings, approximately 12,834 gallons of groundwater were pumped from the basement sump between September 2 and December 28, 2004. During each site visit by Cambria personnel, the flow totalizer was cleaned and inspected to verify that it was operating properly. According to Mr. Kurt Soto of Romic Environmental, dewatering operations for the elevator shaft were terminated on January 25, 2005. During the construction of the elevator shaft, 8 cubic yards of soil were excavated and transported for proper disposal at a Chevron-approved facility. No petroleum hydrocarbons were detected in the soil composite sample used to profile the excavated soil for disposal.

The site is located on the southeast corner of South Delaware Street and Concar Drive in San Mateo, California, as shown on the Site Vicinity Map. The locations of the former underground storage tanks (USTs), former dispenser islands, groundwater monitoring wells, soil boring locations, and other select site features are shown on the Generalized Site Plan. Properties in the vicinity of the site are occupied by residential and commercial developments, including a Shell service station located on the northwest corner of South Delaware Street and Concar Drive. Currently there are five groundwater monitoring wells (MW2, MW3A, MW4, MW5A, and MW7), six piezometers (PZI through PZ6), and one groundwater extraction well (EWI) at the subject site. One groundwater monitoring well (MW6) is located in the sidewalk adjacent to South Delaware Street, west of the subject site. The piezometers and extraction well are completed in a groundwater extraction trench. Gasoline delivery lines were removed and replaced in 1982 as a result of a failed pressure test. In July 1986, a hydrocarbon sheen was observed on the groundwater surface in a trench (approximately 1 foot below grade) during modification of the gasoline delivery line and pump island. Water collected from the yump island trench contained dissolved-gasoline hydrocarbons. In November 1991, two oil-water sample was collected at one of the locations. In February and March 1998, ERI observed removal of three gasoline USTs, no used oil UST, five hoists, product lines, and dispensers: No holes or crac
		and MW4 at the site. In October 1990, HLA advanced borings B1 through

EDR ID Number Database(s) EPA ID Number

## SAN MATEO EXXON #7-4135 (Continued)

S103894102

B6, installed groundwater monitoring wells MW5 through MW7, and conducted a slug test to estimate the transmissivity and hydraulic conductivity of the aquifer at the site. HLA estimated a hydraulic conductivity ranging from 0.21 to 1.28 feet per day and the groundwater velocity from 0.05 to 0.07 feet per day. In August 1991, HLA destroyed groundwater monitoring wells MW3 and MW5 to facilitate soil excavation and interceptor trench installation. During September and October 1991, HLA installed piezometers PZ1 through PZ6 and extraction well EW1 during construction of the groundwater interceptor trench. During repaving of the site, four of the piezometers and groundwater monitoring well MW2 were paved over with asphalt. In January 1992, HLA uncovered well MW2 and found the interior of the casing to be filled with soil. In May 1992, HLA cleared soil from the casing and reported a sheen on the groundwater. In February 1992, HLA advanced soil borings B1 through B7 at the site. Two of the borings were converted to wells MW3A and MW5A. In July 1997, ERI advanced soil borings SB? through SB3 using a hand auger. Well MW1 was destroyed by ERI during UST removal activities. In November 2002, ERI advanced soil borings SB4, and SB8 through SB12. Soil and water samples were collected. In January 2003, ERI advanced soil borings SB5a, SBSb, SB6, SB7, and SB13. In September 2004, ERI advanced soil borings SBIOA, SB11 A, SB12A, and SBONV at the subject site. Also in September 2004, ERI conducted a subsurface utility survey and advanced soil borings SL1 through SL8 into subsurface utility line backfill materials in Concar Drive and South Delaware Street. HLA bailed free product from wells MWI, MW2, and MW3 on a monthly basis from December 1989 through November 1993. In August 1991, HLA observed excavation of approximately 1,300 cubic yards of soil from the northwest guarter of the site and backfilled the excavation with Class III aggregate. Soil samples 1 through 13 were collected from the sidewalls of the excavation. During September and October 1991, HLA installed the groundwater interceptor trench. Soil samples 14 through 17 were collected during trench installation. During installation, HLA discovered oil and grease in the vicinity of the used oil UST. In September 1991, the interceptor trench contained approximately 15,000 gallons of water. HLA supervised dewatering and collected samples from the piezometers. In September 1993, RESNA conducted a combined pumping and recovery test using well EW1 as the pumping well. RESNA determined the transmissivities of the native sediments (Bay Mud) are very low to moderate (5x10-~f2 1min) and concluded that, "it does not appear that pumping from EW1 can gain hydraulic control of wells toward the distal end of the interceptor trench. ERI operated the groundwater extraction system continuously from August 24, 1994, through March 18, 1998. Quarterly groundwater monitoring and sampling was initiated at the site in May 1989. ERI began quarterly monitoring and sampling in 1994. Semi-annual monitoring and sampling (first and third guarters) was initiated in 2003. ERI conducted an underground utility survey in 2003 by obtaining storm drain, sanitary sewer, water, and gas line maps showing their approximate locations in Concar Drive and South Delaware Street. ERI conducted a groundwater receptor survey in 2003. No water wells were identified within 750 feet of site. Receptor survey questionnaires were mailed to residents within the search radius and followed up with a door-to-door survey of non-respondents and a visual reconnaissance of the area for wells, basements, and surface water bodies on February 13, 2003, ERI also conducted a land use survey during the field reconnaissance in February 2003. In April

## SAN MATEO EXXON #7-4135 (Continued)

## S103894102

2004 and March 2005, ERI conducted sensitive receptor survey (SRS) updates including file reviews and field visits. ERI contacted the Sacramento District office of the California Department of Water Resources (DWR) and requested information regarding water wells within a 2,000-foot radius of the site from the well driller's report archive. ERI also contacted the GPP and the City of San Bruno Public Works and Engineering Department (the City) and requested information regarding water wells in the survey radius. ERI contacted the City and other local utility agencies and obtained subsurface utility maps of Concar Drive and South Delaware Street adjacent to the subject site. On April 29, 2004, and March 11, 2005, ERI's representative visited the site and conducted a reconnaissance of the area within a 2,000-foot radius of the site for evidence of private and municipal water wells and buildings with basements; mapped the locations of surface water bodies, schools and daycare centers, hospitals, subways, and tunnels within the survey radius; photographed the site, utility vaults, storm drains, surface water bodies, and potential receptors; and mapped the locations of on-site utility vaults and storm drains. The location of one inactive irrigation water well, identified in the DWR search, was confirmed on East 19th Avenue,

approximately 985 feet southwest of the subject site. One surface water body, an unnamed drainage ditch, was identified approximately

1,310 feet northwest of the subject site.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 08/05/2016 Date Data Arrived at EDR: 10/05/2016 Date Made Active in Reports: 01/06/2017 Number of Days to Update: 93 Source: EPA Telephone: N/A Last EDR Contact: 01/05/2017 Next Scheduled EDR Contact: 04/17/2017 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 1 Telephone 617-918-1143

EPA Region 3 Telephone 215-814-5418

EPA Region 4 Telephone 404-562-8033

EPA Region 5 Telephone 312-886-6686

EPA Region 10 Telephone 206-553-8665

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

#### Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 08/05/2016 Date Data Arrived at EDR: 10/05/2016 Date Made Active in Reports: 01/06/2017 Number of Days to Update: 93 Source: EPA Telephone: N/A Last EDR Contact: 01/05/2017 Next Scheduled EDR Contact: 04/17/2017 Data Release Frequency: Quarterly

#### Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/04/2016	Telephone: 703-603-8704
Date Made Active in Reports: 10/21/2016	Last EDR Contact: 01/05/2017
Number of Days to Update: 17	Next Scheduled EDR Contact: 04/17/2017
	Data Release Frequency: Varies

#### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/10/2016 Date Data Arrived at EDR: 10/20/2016 Date Made Active in Reports: 01/06/2017 Number of Days to Update: 78 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/06/2017 Next Scheduled EDR Contact: 05/01/2017 Data Release Frequency: Quarterly

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/10/2016 Date Data Arrived at EDR: 10/20/2016 Date Made Active in Reports: 01/06/2017 Number of Days to Update: 78 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/06/2017 Next Scheduled EDR Contact: 05/01/2017 Data Release Frequency: Quarterly

### Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/12/2016	Source: EPA
Date Data Arrived at EDR: 09/28/2016	Telephone: 800-424-9346

	Data Release Frequency: Quarterly

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/12/2016 Date Data Arrived at EDR: 09/28/2016 Date Made Active in Reports: 01/06/2017 Number of Days to Update: 100 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/28/2016 Next Scheduled EDR Contact: 04/10/2017 Data Release Frequency: Quarterly

#### Federal RCRA generators list

### RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/12/2016 Date Data Arrived at EDR: 09/28/2016 Date Made Active in Reports: 01/06/2017 Number of Days to Update: 100 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/28/2016 Next Scheduled EDR Contact: 04/10/2017 Data Release Frequency: Quarterly

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/12/2016 Date Data Arrived at EDR: 09/28/2016 Date Made Active in Reports: 01/06/2017 Number of Days to Update: 100 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/28/2016 Next Scheduled EDR Contact: 04/10/2017 Data Release Frequency: Quarterly

#### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/12/2016Source: Environmental Protection AgencyDate Data Arrived at EDR: 09/28/2016Telephone: (415) 495-8895Date Made Active in Reports: 01/06/2017Last EDR Contact: 12/28/2016Number of Days to Update: 100Next Scheduled EDR Contact: 04/10/2017Data Release Frequency: Varies

#### Federal institutional controls / engineering controls registries

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/28/2015	Source: Department of the Navy

#### Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/26/2016 Date Data Arrived at EDR: 09/29/2016 Date Made Active in Reports: 11/11/2016 Number of Days to Update: 43 Source: National Response Center, United States Coast Guard Telephone: 202-267-2180 Last EDR Contact: 12/28/2016 Next Scheduled EDR Contact: 04/10/2017 Data Release Frequency: Annually

### State- and tribal - equivalent NPL

#### **RESPONSE:** State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 10/31/2016Source: Department of Toxic Substances ControlDate Data Arrived at EDR: 11/01/2016Telephone: 916-323-3400Date Made Active in Reports: 01/18/2017Last EDR Contact: 11/01/2016Number of Days to Update: 78Next Scheduled EDR Contact: 02/13/2017Data Release Frequency: Quarterly

#### State- and tribal - equivalent CERCLIS

#### ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/31/2016 Date Data Arrived at EDR: 11/01/2016 Date Made Active in Reports: 01/18/2017 Number of Days to Update: 78 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 11/01/2016 Next Scheduled EDR Contact: 02/13/2017 Data Release Frequency: Quarterly

#### State and tribal landfill and/or solid waste disposal site lists

#### SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or i nactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 11/14/2016 Date Data Arrived at EDR: 11/15/2016 Date Made Active in Reports: 01/20/2017 Number of Days to Update: 66 Source: Department of Resources Recycling and Recovery Telephone: 916-341-6320 Last EDR Contact: 11/15/2016 Next Scheduled EDR Contact: 02/27/2017 Data Release Frequency: Quarterly

	Data Release Frequency: Quarterly

#### State and tribal voluntary cleanup sites

INDIAN VCP R1: Voluntary Cleanup Priority Listing A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

Date of Government Version: 07/27/2015	Source: EPA, Region 1
Date Data Arrived at EDR: 09/29/2015	Telephone: 617-918-1102
Date Made Active in Reports: 02/18/2016	Last EDR Contact: 12/27/2016
Number of Days to Update: 142	Next Scheduled EDR Contact: 04/10/2017
, ,	Data Release Frequency: Varies

#### INDIAN VCP R7: Voluntary Cleanup Priority Lisitng

A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008 Date Data Arrived at EDR: 04/22/2008 Date Made Active in Reports: 05/19/2008 Number of Days to Update: 27 Source: EPA, Region 7 Telephone: 913-551-7365 Last EDR Contact: 04/20/2009 Next Scheduled EDR Contact: 07/20/2009 Data Release Frequency: Varies

#### VCP: Voluntary Cleanup Program Properties

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 10/31/2016 Date Data Arrived at EDR: 11/01/2016 Date Made Active in Reports: 01/18/2017 Number of Days to Update: 78 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 11/01/2016 Next Scheduled EDR Contact: 02/13/2017 Data Release Frequency: Quarterly

#### State and tribal Brownfields sites

BROWNFIELDS: Considered Brownfieds Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 02/29/2016 Date Data Arrived at EDR: 03/07/2016 Date Made Active in Reports: 05/04/2016 Number of Days to Update: 58 Source: State Water Resources Control Board Telephone: 916-323-7905 Last EDR Contact: 01/04/2017 Next Scheduled EDR Contact: 04/10/2017 Data Release Frequency: Varies

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 09/20/2016 Date Data Arrived at EDR: 09/21/2016 Date Made Active in Reports: 11/11/2016 Number of Days to Update: 51 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 12/20/2016 Next Scheduled EDR Contact: 04/03/2017 Data Release Frequency: Semi-Annually

#### Local Lists of Landfill / Solid Waste Disposal Sites

#### WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

Date of Government Version: 04/01/2000 Date Data Arrived at EDR: 04/10/2000 Date Made Active in Reports: 05/10/2000 Number of Days to Update: 30 Source: State Water Resources Control Board Telephone: 916-227-4448 Last EDR Contact: 11/07/2016 Next Scheduled EDR Contact: 02/20/2017 Data Release Frequency: No Update Planned

#### SWRCY: Recycler Database

A listing of recycling facilities in California.

Local Lists of Hazardous waste / Contaminated	Sites	
US HIST CDL: National Clandestine Laboratory Register A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.		
Date of Government Version: 08/31/2016 Date Data Arrived at EDR: 09/06/2016 Date Made Active in Reports: 09/23/2016 Number of Days to Update: 17	Source: Drug Enforcement Administration Telephone: 202-307-1000 Last EDR Contact: 08/31/2016 Next Scheduled EDR Contact: 10/10/2016 Data Release Frequency: No Update Planned	

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005 Date Data Arrived at EDR: 08/03/2006 Date Made Active in Reports: 08/24/2006 Number of Days to Update: 21 Source: Department of Toxic Substance Control Telephone: 916-323-3400 Last EDR Contact: 02/23/2009 Next Scheduled EDR Contact: 05/25/2009 Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 10/31/2016 Date Data Arrived at EDR: 11/01/2016 Date Made Active in Reports: 01/18/2017 Number of Days to Update: 78 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 11/01/2016 Next Scheduled EDR Contact: 02/13/2017 Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 08/31/2016	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/18/2016	Telephone: 916-255-6504

### TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/30/1995	Telephone: 916-227-4364
Date Made Active in Reports: 09/26/1995	Last EDR Contact: 01/26/2009
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/27/2009
	Data Release Frequency: No Update Planned

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/30/2016	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 09/06/2016	Telephone: 202-307-1000

Date Made Active in Reports: 01/10/2017	Last EDR Contact: 11/28/2016 Next Scheduled EDR Contact: 03/13/2017

HIST UST: Hazardous Substance Storage Container Database The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990 Date Data Arrived at EDR: 01/25/1991 Date Made Active in Reports: 02/12/1991 Number of Days to Update: 18 Source: State Water Resources Control Board Telephone: 916-341-5851 Last EDR Contact: 07/26/2001 Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

### CA FID UST: Facility Inventory Database

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994 Date Data Arrived at EDR: 09/05/1995 Date Made Active in Reports: 09/29/1995 Number of Days to Update: 24 Source: California Environmental Protection Agency Telephone: 916-341-5851 Last EDR Contact: 12/28/1998 Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

### Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 08/25/2016 Date Data Arrived at EDR: 09/06/2016 Date Made Active in Reports: 10/14/2016 Number of Days to Update: 38 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 12/02/2016 Next Scheduled EDR Contact: 03/20/2017 Data Release Frequency: Varies

## LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/18/2014 Date Data Arrived at EDR: 03/18/2014 Date Made Active in Reports: 04/24/2014 Number of Days to Update: 37 Source: Environmental Protection Agency Telephone: 202-564-6023 Last EDR Contact: 10/28/2016 Next Scheduled EDR Contact: 02/06/2017 Data Release Frequency: Varies

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/06/2016 Date Data Arrived at EDR: 12/06/2016 Date Made Active in Reports: 01/20/2017 Number of Days to Update: 45 Source: DTSC and SWRCB Telephone: 916-323-3400 Last EDR Contact: 12/06/2016 Next Scheduled EDR Contact: 03/20/2017 Data Release Frequency: Semi-Annually

### **Records of Emergency Release Reports**

HMIRS: Hazardous Materials Information Reporting System Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 06/27/2016	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 06/28/2016	Telephone: 202-366-4555
Date Made Active in Reports: 09/23/2016	Last EDR Contact: 12/28/2016

Number of Days to Optiate. 37	Data Release Frequency: Quarterly

#### SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012Source: FirstSearchDate Data Arrived at EDR: 01/03/2013Telephone: N/ADate Made Active in Reports: 02/22/2013Last EDR Contact: 01/03/2013Number of Days to Update: 50Next Scheduled EDR Contact: N/AData Release Frequency: No Update Planned

#### Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/12/2016 Date Data Arrived at EDR: 09/28/2016 Date Made Active in Reports: 01/06/2017 Number of Days to Update: 100 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/28/2016 Next Scheduled EDR Contact: 04/10/2017 Data Release Frequency: Varies

### FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 01/31/2015 Date Data Arrived at EDR: 07/08/2015 Date Made Active in Reports: 10/13/2015 Number of Days to Update: 97 Source: U.S. Army Corps of Engineers Telephone: 202-528-4285 Last EDR Contact: 12/08/2016 Next Scheduled EDR Contact: 03/20/2017 Data Release Frequency: Varies

## DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 11/10/2006
Date Made Active in Reports: 01/11/2007

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Date of Government Version: 03/07/2011 Date Data Arrived at EDR: 03/09/2011 Date Made Active in Reports: 05/02/2011 Number of Days to Update: 54 Source: Environmental Protection Agency Telephone: 615-532-8599 Last EDR Contact: 11/17/2016 Next Scheduled EDR Contact: 11/28/2016 Data Release Frequency: Varies

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 07/12/2016 Date Data Arrived at EDR: 08/17/2016 Date Made Active in Reports: 10/21/2016 Number of Days to Update: 65 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 11/16/2016 Next Scheduled EDR Contact: 02/27/2017 Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 11/08/2016 Next Scheduled EDR Contact: 02/20/2017 Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 04/22/2013 Date Data Arrived at EDR: 03/03/2015 Date Made Active in Reports: 03/09/2015 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 11/11/2016 Next Scheduled EDR Contact: 02/20/2017 Data Release Frequency: Varies

### TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2012 Date Data Arrived at EDR: 01/15/2015 Date Made Active in Reports: 01/29/2015 Number of Days to Update: 14 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 12/23/2016 Next Scheduled EDR Contact: 04/03/2017 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2014 Date Data Arrived at EDR: 11/24/2015 Date Made Active in Reports: 04/05/2016 Number of Days to Update: 133 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 11/22/2016 Next Scheduled EDR Contact: 03/06/2017 Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009 Date Data Arrived at EDR: 12/10/2010 Date Made Active in Reports: 02/25/2011 Number of Days to Update: 77

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 08/01/2016 Date Data Arrived at EDR: 08/22/2016 Date Made Active in Reports: 11/11/2016 Number of Days to Update: 81 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 11/18/2016 Next Scheduled EDR Contact: 02/06/2017 Data Release Frequency: Varies

#### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35 Source: EPA Telephone: 202-564-4104 Last EDR Contact: 06/02/2008 Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

### COAL ASH DOE: Steam-Electric Plant Operation Data A listing of power plants that store ash in surface ponds.

Date of Government Version: 12/31/2005	Source: Department of Energy
Date Data Arrived at EDR: 08/07/2009	Telephone: 202-586-8719
Date Made Active in Reports: 10/22/2009	Last EDR Contact: 12/06/2016
Number of Days to Update: 76	Next Scheduled EDR Contact: 03/20/2017 Data Release Frequency: Varies

COAL ASH EPA: Coal Combustion Residues Surface Impoundments List A listing of coal combustion residues surface impoundments with high hazard potential ratings.

Date of Government Version: 07/01/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/10/2014	Telephone: N/A
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 12/06/2016
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/20/2017
	Data Release Frequency: Varies

### PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 02/01/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/19/2011	Telephone: 202-566-0517
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 10/28/2016
Number of Days to Update: 83	Next Scheduled EDR Contact: 02/06/2017
	Data Release Frequency: Varies

#### **RADINFO:** Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 10/03/2016 Date Data Arrived at EDR: 10/05/2016 Date Made Active in Reports: 10/21/2016 Number of Days to Update: 16 Source: Environmental Protection Agency Telephone: 202-343-9775 Last EDR Contact: 01/06/2017 Next Scheduled EDR Contact: 04/17/2017 Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

#### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

	: Uranium Mill Tailings Sites ranium ore was mined by private companies f	for federal government use in national defense programs. When the mills

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 11/16/2016 Date Data Arrived at EDR: 11/18/2016 Date Made Active in Reports: 01/20/2017 Number of Days to Update: 63 Source: California Integrated Waste Management Board Telephone: 916-341-6066 Last EDR Contact: 11/11/2016 Next Scheduled EDR Contact: 02/27/2017 Data Release Frequency: Varies

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2015 Date Data Arrived at EDR: 10/12/2016 Date Made Active in Reports: 12/15/2016 Number of Days to Update: 64	Source: California Environmental Protection Agency Telephone: 916-255-1136 Last EDR Contact: 01/09/2017 Next Scheduled EDR Contact: 04/24/2017 Data Release Frequency: Annually

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Date of Government Version: 06/09/2016 Date Data Arrived at EDR: 06/13/2016 Date Made Active in Reports: 09/02/2016 Number of Days to Update: 81 Source: Department of Interior Telephone: 202-208-2609 Last EDR Contact: 12/09/2016 Next Scheduled EDR Contact: 03/27/2017 Data Release Frequency: Quarterly

### ECHO: Enforcement & Compliance History Information

ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

#### EDR HIGH RISK HISTORICAL RECORDS

### EDR Exclusive Records

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

### EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

### EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## YUBA COUNTY:

**CUPA Facility List** 

CUPA facility listing for Yuba County.

Date of Government Version: 10/28/2016 Date Data Arrived at EDR: 11/03/2016 Date Made Active in Reports: 12/15/2016 Number of Days to Update: 42

Source: Yuba County Environmental Health Department Telephone: 530-749-7523 Last EDR Contact: 10/31/2016 Next Scheduled EDR Contact: 02/13/2017 Data Release Frequency: Varies

### **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.	
Date of Government Version: 07/30/2013 Date Data Arrived at EDR: 08/19/2013 Date Made Active in Reports: 10/03/2013 Number of Days to Update: 45	Source: Department of Energy & Environmental Protection Telephone: 860-424-3375 Last EDR Contact: 11/11/2016 Next Scheduled EDR Contact: 02/27/2017 Data Release Frequency: No Update Planned

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

## **GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM**

### TARGET PROPERTY ADDRESS

SAN MATEO EXPO CENTER 2495 S DELAWARE ST SAN MATEO, CA 94403

## TARGET PROPERTY COORDINATES

Latitude (North):	37.546665 - 37° 32' 47.99"
Longitude (West):	122.301362 - 122° 18' 4.90"
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	561716.1
UTM Y (Meters):	4155543.2
Elevation:	11 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	5640626 SAN MATEO, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## **GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE SUMMARY**

## **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

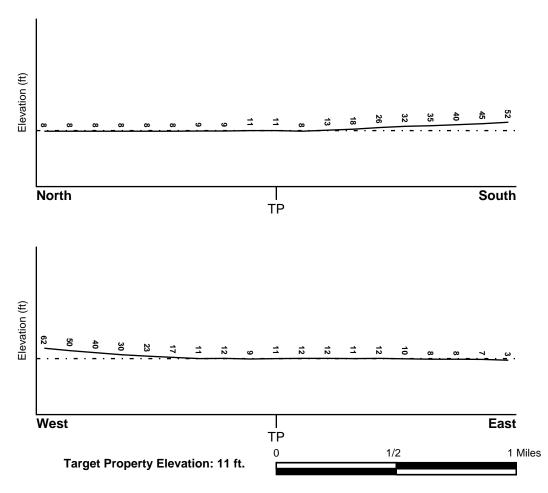

## **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## **GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE SUMMARY**

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06081C0166F	FEMA FIRM Flood data
Additional Panels in search area:	FEMA Source Type
06081C0162F	FEMA FIRM Flood data
NATIONAL WETLAND INVENTORY	
NWI Quad at Target Property SAN MATEO	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:		
Search Radius:	1.25 miles	
Status:	Not found	

## **AQUIFLOW**®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

#### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

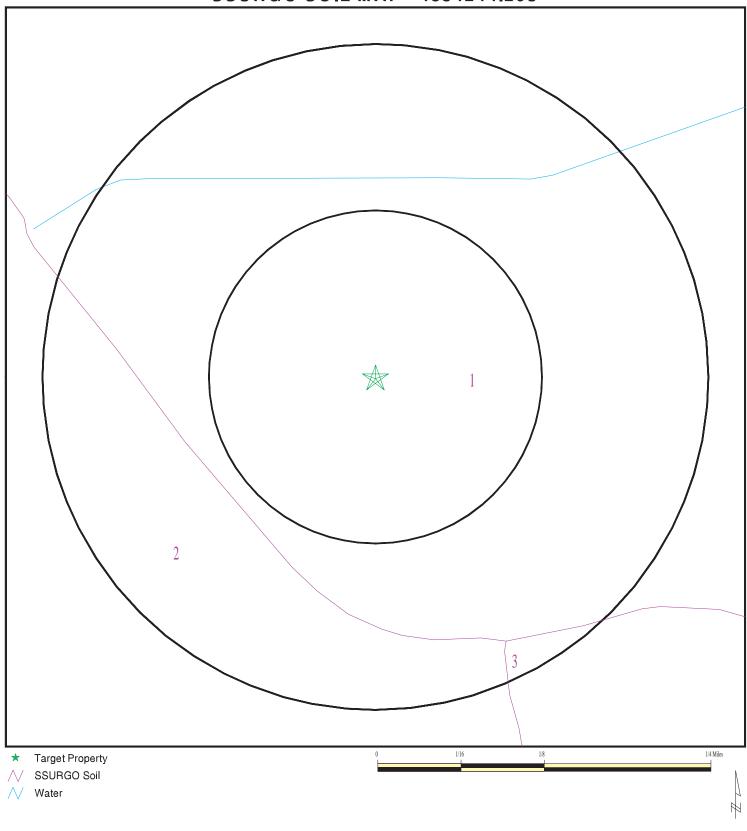

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

#### **GEOLOGIC AGE IDENTIFICATION**

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	Urban land
Soil Surface Texture: Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class: Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information						
	Boui	ndary		Classification Saturated			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		Soil Reaction (pH)
1	0 inches	5 inches		Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 2	
Soil Component Name:	Urban land
Soil Surface Texture: Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class: Hydric Status: Not hydric	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

Soil Layer Information							
	Boui	ndary		Classification		Saturated hydraulic

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish & Game Telephone: 916-445-0411

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

#### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

#### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

#### **OTHER STATE DATABASE INFORMATION**

California Oil and Gas Well Locations Source: Department of Conservation Telephone: 916-323-1779 Oil and Gas well locations in the state.

#### RADON

State Database: CA Radon Source: Department of Health Services Telephone: 916-324-2208 Radon Database for California

Area Radon Information

Source: USGS Telephone: 703-356-4020 The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Engeo were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

#### Certified Sanborn Results:

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Engeo were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

#### Certified Sanborn Results:

Certification #	3CA6-4613-B745

### **EDR Environmental Lien and AUL Search**

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

*Thank you for your business.* Please contact EDR at 1-800-352-0050 with any questions or comments.

#### ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE FOR "<u>KEY SITE MANAGER</u>"

To evaluate the potential for possible environmentally related impacts and site contamination the following information is requested. This questionnaire is to be preferably completed by the current property owner, or owner representative, leasing agent, or other person having good knowledge of the uses and physical characteristics of the property (Key Site Manager).

#### PART I

1. Property Address/Location and Assessor's Parcel Number (APN):

1346 Saratoga Dr, San Mateo CA 94403 (Main entrance) APN 040-030-220

2. Current property owner (name, address, voice/fax number):

San Mateo County Event Center (Expo): Administration Mailing Address 2495 S. Delaware Street, San Mateo, CA 94403 Phone:(650) 574-3247 Fax:(650) 574-3985

3. Date current property owner assumed title of property:

August 1938

4. Current property development/improvements:

The San Mateo County Event Center is a 48-acre event facility with seven indoor buildings. The Expo Center hosts hundreds of events each year including trade/consumer shows, product launches, ride & drives, concerts, social gatherings, and corporate meetings. Buildings are approximately 200k sf. The remainder of the area is paved parking.

5. Past property use, development/improvements:

Fairgrounds, Jockey Club, Event Center

6. Neighboring property uses:

The Event Center is bounded by Delaware Street and Saratoga Drive on the East, West and North. Across Delaware Street is a storage facility and CalTrain parking lots. To the south is the Bay Meadows Park, and the Nueva School Campus.

No

Yes

PART II - The following questions should be answered to the best of your knowledge.

- 1. Is/has the property or any adjoining property used/been used for industrial purposes?
- 2. Has the *property* or any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?
- 3. Are there currently, or have there been previously, any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of greater than 5 gal in volume or 50 gal in the aggregate, stored on or used at the *property* or at the facility?
- 4. Has undocumented soil been brought onto the property at any time? If yes, estimated quantity is \_\_\_\_\_\_ cubic yards.
- 5. Has soil been brought onto the property that originated from a contaminated site or that is of an unknown origin?
- 6. Are there currently, or have there been previously, any pits, ponds, or lagoons located on the *property* in connection with waste treatment or waste disposal?
- 7. Is there currently, or has there been previously, any stained soil on the property?
- 8. Are there currently, or have there been previously, any registered or unregistered storage tanks (above or underground) located on the *property*?
- 9. Are there currently, or have there been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the *property* or adjacent to any structure located on the *property*?
- 10. Are there currently, or have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?
- 11. Are there any domestic, irrigation or monitoring wells on the property?
- 12. If the *property* is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environmental/health agency?
- 13. Have you been informed of the past or current existence of *hazardous substances* or *petroleum products* or environmental violations with respect to the *property* or any facility located on the *property*?
- 14. Have there been any *environmental site assessments* of the *property* or facility that indicated the presence of *hazardous substances* or *petroleum products* on, or contamination of, the *property* or recommended further assessment of the *property*?
- 15. Have there been any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any *hazardous substance* or *petroleum products* involving the *property*?
- 16. Has there been any past agricultural use of the property, such as orchards or seed crop cultivation?
- 17. Have any *hazardous substances* or *petroleum products*, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the *property*?
- 18. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?

#### ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE FOR <u>CLIENT</u>

To evaluate the potential for possible environmentally related impacts and site contamination the following information is requested. This questionnaire is to be completed by the user of the phase one environmental site assessment, or their authorized representative.

#### PART I

1. Property address and Assessor's Parcel Number (APN):

1346 Saratoga Dr, San Mateo CA 94403 (Main entrance) APN 040-030-220

2. Current property owner (name, address, voice/fax number):

San Mateo County Event Center (Expo): Administration Mailing Address 2495 S. Delaware Street, San Mateo, CA 94403 Phone:(650) 574-3247 Fax:(650) 574-3985

3. Date current property owner assumed title of property:

August 1938

4. Current property development/improvements:

The San Mateo County Event Center is a 48-acre event facility with seven indoor buildings. The Expo Center hosts hundreds of events each year including trade/consumer shows, product launches, ride & drives, concerts, social gatherings, and corporate meetings. Buildings are approximately 200k sf. The remainder of the area is paved parking.

5. Past property use, development/improvements:

Racing track (horse)

6. Neighboring property uses:

The Event Center is bounded by Delaware Street and Saratoga Drive on the East, West and North. Across Delaware Street is a storage facility and CalTrain parking lots. To the south is the Bay Meadows Park, and the Nueva School Campus.

#### PART II

- 1. Are you aware of any environmental cleanup liens against the *property* that are filed under federal, tribal, local or state law?
- 2. Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded in a registry under federal, tribal, state or local law?
- 3. Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example are you involved in the same line of business as the current or former occupants of the *property* or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
- 4. If a property transaction is occurring in conjunction with this environmental assessment, does the purchase price of this *property* reasonably reflect the fair market value of the *property*?
- 5. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?
- 6. Are you aware of any commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a) do you know of specific chemicals that are present or once were present at the *property*?(b) do you know of spills or other chemical releases that have taken place at the *property*?(c) do you know of any environmental cleanups that have taken place at the *property*?

7. Based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of contamination at the *property*?

#### If a "Yes" response was provided to any of the above questions, please provide details below:

At one time an underground fuel tank existed on the property. It was removed reference San Mateo County Letter dated September 2002, APN 040-030-080, Site #110110.

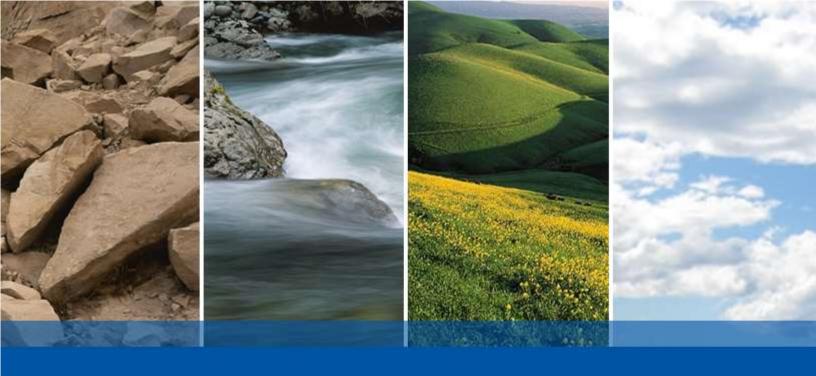

I certify that the information herein is true and correct to the best of my knowledge as of the date signed below.

File Review Excerpts

# SAN MATEO COUNTY GROUNDWATER PROTECTION PROGRAM CASE CLOSURE M E M O R A N D U M

TO: File

**FROM:** Groundwater Protection Program staff

DATE:

January 28, 2002

SUBJECT: Site No. 110110 San Mateo County Fairgrounds 2495 South Delaware Street San Mateo, California

# I. BACKGROUND HISTORY OF THE CASE

The subject is located at 2495 South Delaware Street in San Mateo (see Figure 1). The subject site is currently the County fairgrounds, and contains an equipment maintenance facility. According to Atlas Engineering Services, Inc. (Atlas), the subject property contained one 1,000-gallon fiberglass underground storage tanks (UST) utilized to store gasoline.

# 1.1 TANK REMOVAL

On May 6, 1997, Atlas oversaw the removed the 1,000-gallon UST. No pump or piping was observed and it is assumed that the pump was located directly above the UST. Groundwater was present in the pit at a depth of approximately 6 feet bgs. A sheen was noted on the groundwater surface. The tank was transported, under Hazardous Waste Manifest #96434619 to Erickson, Inc. in Richmond, California. According to the overseeing Inspector's field notes, the tank was in good condition with obvious visible soil contamination and hydrocarbon odor. Groundwater was encountered during tank removal activities at approximately 6 ft bgs. A sample of water that was observed in the pit was collected and analyzed. Following tank removal activities, two soil samples was collected from the sidewalls of the excavation at approximately 6 feet below the ground surface (bgs). Analytical results are summarized on Tables 1 and 2 and sample locations are illustrated on Figure 2. The stockpiled soil, consisting of pea gravel, was replaced back into the excavation. It is reported that a sample of the stockpiled soil was not collected because "the backfill was pea gravel which does not absorb hydrocarbons." However, it is not reported whether the groundwater encountered in the excavation pit was pumped out.

#### 2.0 INVESTIGATION METHODS

# 2.1 SUBSURFACE INVESTIGATION

#### 2.2 MONITORING WELL INSTALLATION

On April 20, 2000 Atlas installed three borings to a depth of 12 feet bgs. Temporary casings were installed and groundwater gradient and flow direction were calculated to be 0.025 ft/ft in the direction 16 degrees clockwise from north, or generally towards the north. Based on the flow direction determine, Atlas installed a two-inch diameter, Schedule 40 PVC monitoring well, MW-1 in boring B-3, in the general down-gradient direction from the former UST (Figure 3). The well was completed to a depth of 15 feet bgs with the lower five feet consisting of 0.020-inch slotted screen, with the upper 10 feet of blank casing.

No soil samples were collected from the borings or the monitoring well MW-1. The monitoring well was developed and sampled on April 25, 2000. Analytical results are summarized on Table 3 and sample locations are illustrated on Figure 3.

Date	TPH-g	TPH-d	Benzene	Toluene	Ethyl- benzene	Xylenes	MTBE	Lead
<u> </u>				MW-1				
4/25/2000	52	NA	0.8	0.9	<0.5	<1.0	< 0.51	NA

MTBE analyzed by EPA Method 8260.

In order to determine groundwater plume stability, three groundwater monitoring events were

Closure Memorandum SMCo Site #110110 January 28, 2002 Page 3 of 5

conducted at the site. Analytical results are summarized on Table 3 and the monitoring well location is illustrated on Figure 3.

# 3.0 EXTENT OF SOIL AND GROUNDWATER POLLUTION

Soil sample analytical results from the USTs excavation detected 1,100 mg/kg of TPH-g and 4.2 mg/kg benzene in soil sample from the east sidewall. The sample was collected at 6 feet bgs. The depth to water noted in the borings and monitoring well ranged between 2.5 feet to 4 feet bgs. Therefore, based on the depth to water at the site, it is presumed that the soil samples collected from the sidewalls of the UST pit were likely saturated and not representative of actual vadose zone soil conditions.

Following the removal of the UST, a groundwater sample was collected from the excavation pit. Analytical results detected 17,000  $\mu$ g/L TPH-g, 220  $\mu$ g/L benzene, and 7,200  $\mu$ g/L MTBE. Monitoring well MW-1, installed approximately 21 feet down-gradient of the former UST, detected 52  $\mu$ g/L TPH-g, 0.8  $\mu$ g/L benzene, and <0.5  $\mu$ g/L MTBE (EPA Method 8260) during the first monitoring event conducted on April 25, 2000. Subsequent sampling events detected contaminants 52  $\mu$ g/L TPH-g, 0.6  $\mu$ g/L ethylbenzene, and 4  $\mu$ g/L MTBE. Benzene was not detected above the laboratory detection limit. Based on the groundwater sampling, the groundwater plume appears to be local and is stable.

# 4.0 LOCAL AND REGIONAL HYDROGEOLOGY

Soil encountered during the removal of the USTs and installation of the borings, was reported to be fill material ranging from to a depth of 2 ft to 4.5 ft bgs, underlain by high brown silty clay to a depth of around 10 to 11 ft bgs. Sandy clays were encountered to a depth of 15 ft, the maximum depth explored. Groundwater gradient and flow direction was calculated to be 0.025 ft/ft in the direction 16 degrees clockwise from north, or generally towards the north. Based on this information, the monitoring well at the subject site is located in down-gradient of the former UST (see Figure 3).

# 5.0 **BENEFICIAL USES**

Marina Lagoon and San Francisco Bay lie approximately 3,420 feet northeast of the site. The site is located in a commercial/residential area. It is unlikely that the remaining soil contamination will migrate to domestic wells or surface water. A well survey was not required.

# 6.0 **REMEDIATION ACTIVITIES**

No remediation was conducted at this site.

Closure Memorandum SMCo Site #110110 January 28, 2002 Page 4 of 5

# 7.0 **REMEDIATION EFFECTIVENESS**

No remediation was conducted at this site.

## CONCLUSIONS

This case is considered a "Low-Risk Groundwater Case" as defined by the California Regional Water Quality Control Board, San Francisco Bay Region's memorandum termed "Supplemental Instructions to State Water Board December 8, 1995, Interim Guidance on Required Cleanup at Low-Risk fuel Sites."

# LOW RISK GROUNDWATER CASE

- 1. The leak has been stopped and ongoing sources, including free product, have been removed. The tank and associated piping were removed and disposed properly.
- 2. The site has been adequately characterized. Soil sample analytical results from the USTs excavation detected 1,100 mg/kg of TPH-g and 4.2 mg/kg benzene in soil sample from the east sidewall. The sample was collected at 6 feet bgs. The depth to water noted in the borings and monitoring well ranged between 2.5 feet to 4 feet bgs. Therefore, based on the depth to water at the site, it is presumed that the soil samples collected from the sidewalls of the UST pit were likely saturated and not representative of actual vadose zone soil conditions.

Following the removal of the UST, a groundwater sample was collected from the excavation pit. Analytical results detected 17,000  $\mu$ g/L TPH-g, 220  $\mu$ g/L benzene, and 7,200  $\mu$ g/L MTBE. Monitoring well MW-1, installed approximately 21 feet down-gradient of the former UST, detected 52  $\mu$ g/L TPH-g, 0.8  $\mu$ g/L benzene, and <0.5  $\mu$ g/L MTBE (EPA Method 8260) during the first monitoring event conducted on April 25, 2000. Subsequent sampling events detected contaminants 52  $\mu$ g/L TPH-g, 0.6  $\mu$ g/L ethylbenzene, and 4  $\mu$ g/L MTBE. Benzene was not detected above the laboratory detection limit.

- 3. The dissolved hydrocarbon plume is not migrating. Monitoring well MW-1, installed approximately 21 feet down-gradient of the former UST, detected 52  $\mu$ g/L TPH-g, 0.8  $\mu$ g/L benzene, and <0.5  $\mu$ g/L MTBE (EPA Method 8260) during the first monitoring event conducted on April 25, 2000. Subsequent sampling events detected contaminants 52  $\mu$ g/L TPH-g, 0.6  $\mu$ g/L ethylbenzene, and 4  $\mu$ g/L MTBE. Benzene was not detected above the laboratory detection limit. Based on the groundwater sampling, the groundwater plume appears to be local and is stable.
- 4. No water wells or other sensitive receptors are likely to be impacted.

# Closure Memorandum SMCo Site #110110 January 28, 2002 Page 5 of 5

The site is located in a commercial/residential area. Groundwater sampling events detected low concentrations of contaminants to below laboratory detection limits. Based on the groundwater sampling, the groundwater plume appears to be local and is stable. Therefore, it is unlikely that the remaining soil contamination will migrate to domestic wells or surface water. A well survey was not required.

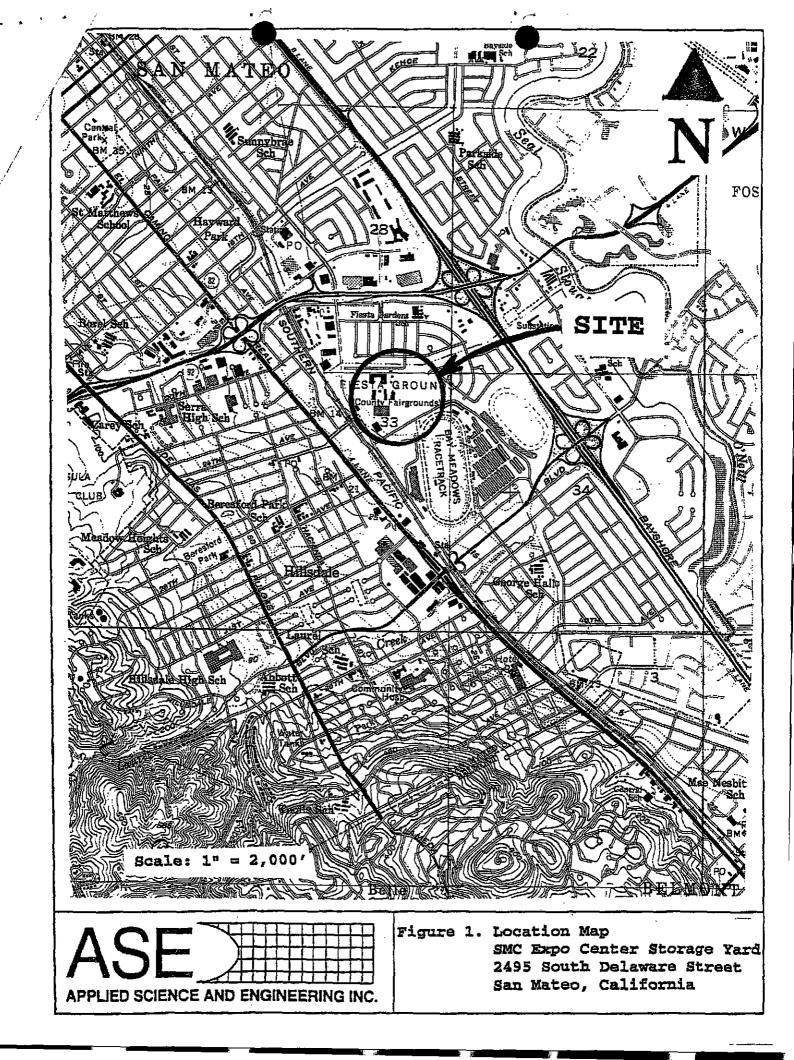

- 5. The site presents no significant risk to human health. Soil sample analytical results from the USTs excavation detected 1,100 mg/kg of TPH-g and 4.2 mg/kg benzene in soil sample from the east sidewall. The sample was collected at 6 feet bgs. The depth to water noted in the borings and monitoring well ranged between 2.5 feet to 4 feet bgs. Therefore, based on the depth to water at the site, it is presumed that the soil samples collected from the sidewalls of the UST pit were likely saturated and not representative of actual vadose zone soil conditions. Groundwater sampling events detected low concentrations of contaminants to below laboratory detection limits. The concentrations of 52  $\mu$ g/L TPH-g and 4  $\mu$ g/L MTBE are below the RWQCB Region 2 RBSLs of 500  $\mu$ g/L for TPH-g and 1800  $\mu$ g/L MTBE. Based on the analytical results, it is unlikely that site presents a significant risk to human health.
- 6. The site presents no significant risk to the environment. Soil sample analytical results from the USTs excavation detected 1,100 mg/kg of TPH-g and 4.2 mg/kg benzene in soil sample from the east sidewall. The sample was collected at 6 feet bgs. The depth to water noted in the borings and monitoring well ranged between 2.5 feet to 4 feet bgs. Therefore, based on the depth to water at the site, it is presumed that the soil samples collected from the sidewalls of the UST pit were likely saturated and not representative of actual vadose zone soil conditions. Groundwater sampling events detected low concentrations of contaminants to below laboratory detection limits. Based on the analytical results, it is unlikely that site presents a significant risk to the environment.

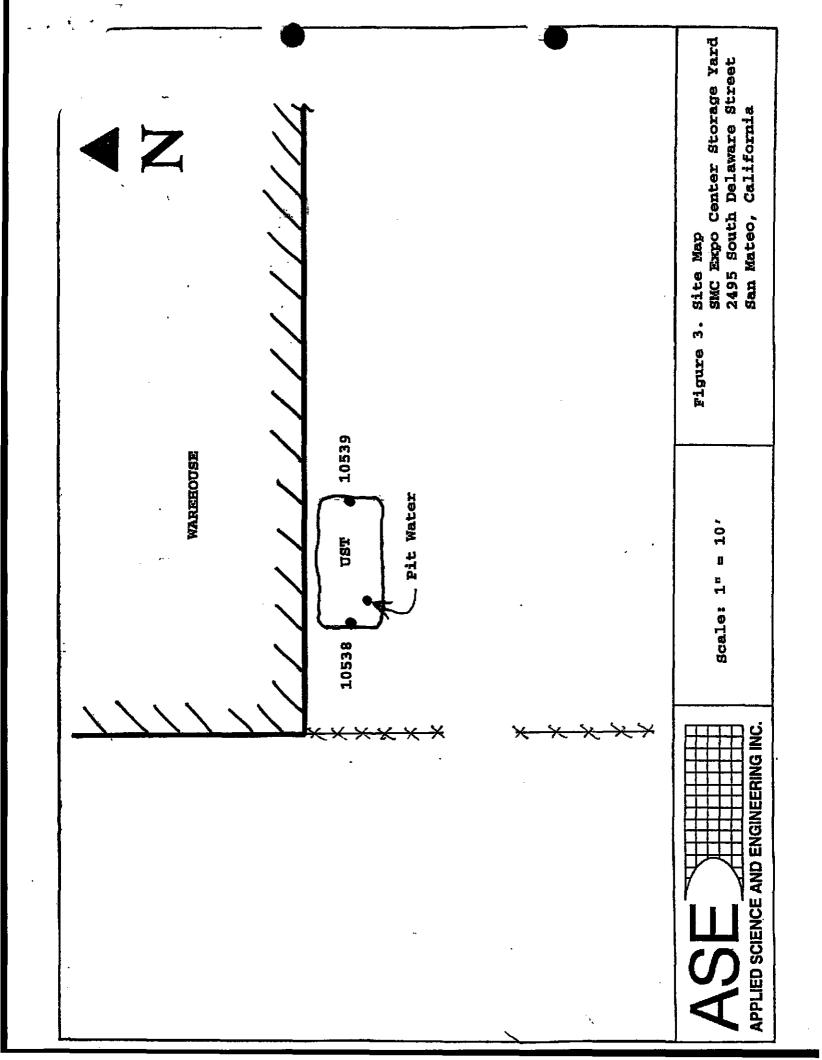

# SIGN-OFF

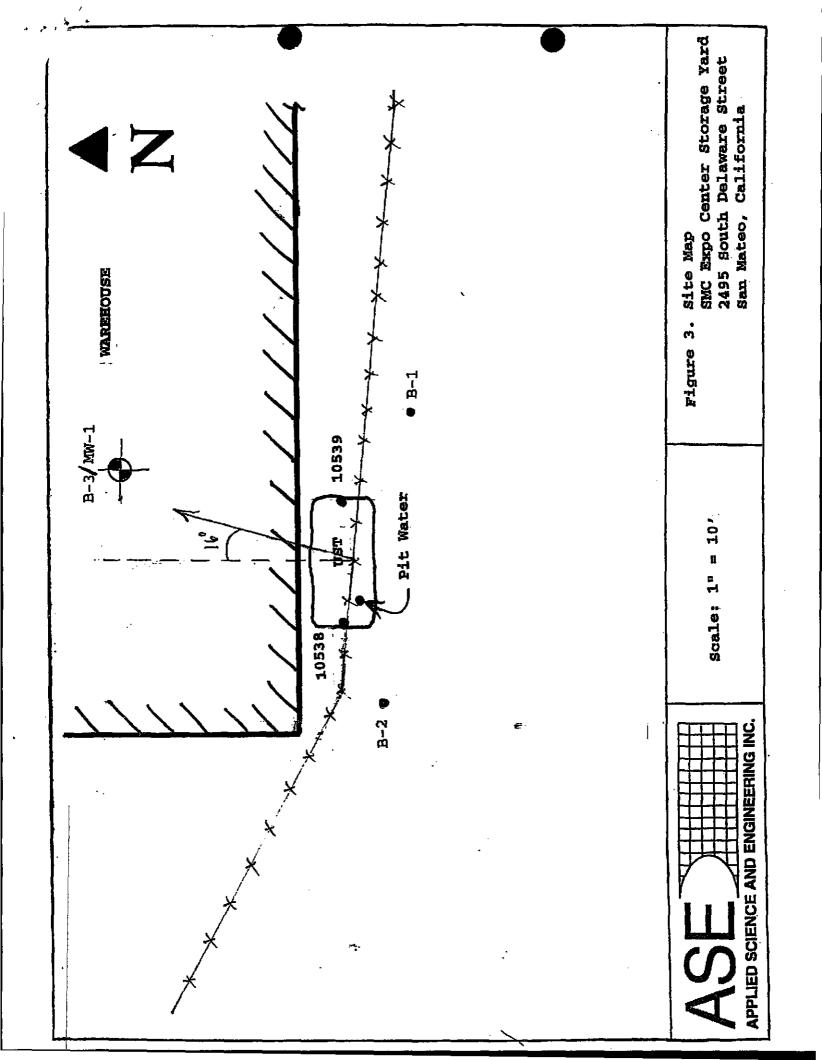

Based on the investigation, and other information which is currently and actually known to this agency, we have determined that all appropriate response actions have been completed, all acceptable or remedial practice were implemented, and no further investigation, remedial/removal action, or monitoring is required at the site with regard to a release of hazardous waste or substance from the underground storage tanks located at the site. We have determined that a significant release of gasoline, diesel fuels, and oil and grease have not occurred and that the shallow waters have not been significantly impacted. San Mateo County Groundwater Protection Program staff have determined that the water quality objectives of the San Francisco Bay Regional Water Quality Control Board have been satisfied.

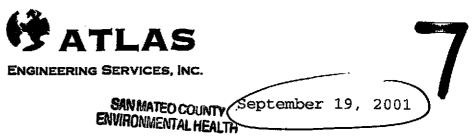

Paresh C. Khatri, Hazardous Materials Specialist

4120/02

Mr. Dermot Casey Department of Public Works County of San Mateo 555 County Center Redwood City, CA 94063

SEP 2 4 2001

# RECEIVED

SUBJECT: Quarterly Groundwater Sampling - Summer 2001 San Mateo County Expo Center Storage Yard 2495 South Delaware Street San Mateo, California

Dear Mr. Casey,

Atlas Engineering Services, Incorporated (AES) respectfully submits the following report of quarterly sampling of monitor well MW-1 at the San Mateo County Expo Center Storage Yard, 2495 South Delaware Street, San Mateo, California (Figure 1). The site formerly contained an Underground Storage Tank (UST) that was located outside a warehouse (Figure 2).

#### <u>1.0 - Introduction</u>

The site formerly had a UST that was used for gasoline (Figure 3). The UST was removed from the ground in May 1997. At the time of UST removal, soil and groundwater samples were found to contain petroleum hydrocarbons (Tables 1). Based on the concentrations of hydrocarbons detected, a groundwater investigation was required by the San Mateo County Department of Health Services (SMCDHS) guidelines. AES proposed to investigate groundwater through construction of a single monitor well at the site in a July 9, 1999 Workplan. SMCDHS requested construction of three monitor wells at the site or construction of a monitor well in the former tank excavation backfill. AES responded in an August 25, 1999 Workplan Addendum for the construction of three temporary borings, site-specific groundwater gradient determination, and construction of one monitor well at the site in the downgradient direction from the former UST. The Workplan was approved in a September 3, 1999 letter from SMCDHS.

On April 20, 2000, AES drilled three borings at the site. B-3 was located inside the warehouse, approximately 20 feet northeast of the former UST, as close as possible based on site constraints within the structure. Also on April 20, 2000, groundwater level measurements were taken at the three temporary borings (B-1, B-2, and B-3) in which temporary PVC casings had been placed and engineering survey was conducted to determine the relative elevations of the PVC casings placed in the three temporary borings. Based on survey and water level data, the horizontal hydraulic gradient was calculated to be 0.025 foot per foot in a direction 16 degrees clockwise from north, or generally towards the north and B-3. After groundwater gradient was determined to be directed to the north, AES constructed monitor

well MW-1 in temporary boring B-3, in the general downgradient direction from the former UST. AES returned to the site on April 25, 2000 to develop and sample monitor well MW-1. The laboratory reported the MW-1 groundwater sample contained low concentrations of petroleum hydrocarbons (Table 2). MW-1 was again sampled in July 2000 (Table 2).

This report documents sampling of MW-1 in August 2001.

#### 2.0 - Sampling of Monitor Well MW-1

On August 29, 2001, AES purged and sampled monitor well MW-1 (see attached field notes). Prior to sampling, depth to water (DTW) was measured at 6.05 feet below top of casing (TOC) and rose to 5.09 feet below TOC after about 20 minutes.

Then, a total of 6 gallons were purged from the well, equal to greater then 3 casing volumes. At the end of development, the DTW measured at 13.7 feet below TOC. The water level was allowed to recover for approximately 27 minutes, at which time DTW was measured at 6.75 feet TOC, indicating that the water level had recovered to 80% of it original level. Then, a groundwater sample was collected from the well using the same bailer used to purge the well. The water was used to fill four 40 milliliter volatile organic analysis (VOA) vials. The samples were labeled and placed in an ice chest containing blue ice for preservation during shipment to the analytical laboratory.

Water generated by sampling was stored on site a 55-gallon drum pending analytical results.

#### 3.0 - Groundwater Analytical Results

The MW-1 groundwater sample was transported under chain of custody (see attached) to North State Environmental Laboratory, a state certified lab. The groundwater sample was analyzed for Total Petroleum Hydrocarbons (TPH) as gasoline, benzene, toluene, ethylbenzene, xylenes, and methyl tertiary butyl ether (MTBE) via EPA Modified Method 8015M and EPA Method 8020.

The laboratory reported that the groundwater sample contained 52 ug/L of TPH as gasoline, 0.6 ug/L ethylbenzene, and 4 ug/L MTBE. The detection of MTBE was confirmed via EPA Method 8260. No benzene, toluene, or xylenes were reported detected in the MW-1 groundwater sample.

#### 4.0 - Summary and Conclusions

This report documents Summer 2001 sampling of monitor well MW-1 at the San Mateo County Expo Center Storage Yard, 2495 South Delaware Street, San Mateo, California (Figure 1, 2). The site formerly had a UST that was used for the storage of gasoline. The UST was removed in May 1997. In April, 2000 three borings were drilled, water level measurements were collected, groundwater gradient was calculated and a monitor well was installed in the apparent downgradient direction from the former tank excavation.

AES purged and sampled monitor well MW-1 on August 29, 2001. The MW-1 groundwater sample was reported by the laboratory to contain TPH as gasoline, ethylbenzene, and MTBE (Table 2).

If you have any questions or require additional information please call me at (650) 363-2445.

Sincerely, Frederick A Yukic, MS, PE Principal Engineer

#### **EDUCATION**

BS, Civil Engineering, University of Illinois at Chicago, 1994 MS, Civil Engineering, University of Illinois at Chicago, 1996

PhD, Civil Engineering, University of Illinois at Chicago, 1999

MBA, Concentration in Real Estate and Finance, University of Washington, 2004

#### EXPERIENCE

Years with ENGEO: 17

# REGISTRATIONS & CERTIFICATIONS

Professional Engineer, CA, 69633 Environmental Manager, NV, 2150 40 Hour HAZWOPER Training, CA, 12100257636

#### **SPECIALIZATIONS**

- Environmental & Stormwater
   Permitting
- Environmental Assessments and Remediation
- Environmental Restoration
- Geologic Hazard Abatement Districts (GHADs)
- Groundwater Modeling
- MS Project

Jeff joined ENGEO in 1999 and is an Associate Engineer directing environmental assessment, characterization, and remediation projects, geotechnical field reconnaissance and explorations, and engineering design and analyses. Jeff has provided financial analyses on real estate development projects as well as project cost-benefit analyses. He also is heavily involved in our Entitlement and Permitting Support services as well as our programs for Geologic Hazard Abatement Districts.

Jeff has performed numerous Phase I and II Environmental Site Assessments and site characterizations, as well as a number of analyses and studies utilizing federal, state, and local directives. He specializes in Brownfield redevelopment projects requiring integrated solutions for the mitigation of geotechnical and environmental hazards. Jeff is experienced in developing financial models, cash flow projections and budgets for a variety of projects requiring innovative financial solutions.

#### **Select Project Experience**

### Foster City Civic Center—Foster City, CA

Group Leader, Assistant Project Manager. Jeff provided technical oversight for phase one environmental site assessment for the Foster City Civic Center site and environmental characterization operations for the site, which was suspected of having been affected by unauthorized petroleum hydrocarbon releases within the subsurface. Following the completion of a soil gas survey, Jeff and team demonstrated that vapor intrusion mitigation systems were not necessary for proposed development, providing a significant cost savings to the project. The project consists of a multi-use urban infill development.

#### Alameda Landing—Alameda, CA

Group Leader, Project Manager. Jeff managed the completion of a phase one environmental site assessment for the Alameda Landing site. He also directed recent environmental characterization operations for the site, which was suspected of having been affected by naturally-occurring methane deposits within the subsurface. Working closely with innovative protocols, Jeff was able to demonstrate to regulatory oversight officials that expensive vapor intrusion mitigation systems were not necessary for proposed residential structures, potentially saving millions of dollars to the site developer. The project consists of a multi-phased single-family and multi-family residential housing development.

# 1000 Howe Road—Martinez, CA

*Project Engineer.* Jeff provided a phase-one environmental site assessment for the project. In addition, he provided a preliminary geotechnical report for this property that has been used as a trucking company's storage yard. The project is a residential development that consists of single-and multiple-story detached residential units.

# Jefferson Street Development—Oakland, CA

*Project Manager.* Jeff served as Project Manager. He provided comprehensive environmental and geotechnical consultation services for a Brownfields redevelopment project in downtown Oakland. The project included several challenges, including limited site access due to onsite business activities, environmental impact related to previous site use, and the presence of several adjacent mid-rise structures. Jeff developed cost effective remedial value engineering solutions to mitigate the presence of geotechnically and environmentally-constraining subsurface solutions. Jeff worked with the design team to establish cost-effective retaining wall and foundation systems, designed and observed a subsurface environmental mitigation program, and assisted in the design of a structure wide vapor barrier. The project, serving as a cornerstone of the revitalization of downtown Oakland, is an excellent example of Jeff's proficiency in delivering cost effective solutions to facilitate Brownfields redevelopment. The project consists of a multi-story residential condominium structure.

# San Ramon Village Plaza—Dublin, CA

*Project Manager.* Jeff served as Project Engineer. He contributed to an environmental peer review of previous land uses, which included a former dry cleaner. Further investigation identified impact due to former site operations. Jeff assisted in a remediation program, closely collaborating with other consultants representing differed parties of the property transaction. The site was efficiently remediated, allowing for redevelopment. The project consists of a high-density residential development within the 4.68-acre mixed-use San Ramon Village Plaza site. The project consists of a high-density residential development within the 4.68-acre mixed-use San Ramon Village Plaza site.

# Los Banos Airport—Los Banos, CA

*Project Engineer.* Jeff provided a Phase I Environmental Site Assessment and a Conceptual Soil Remediation Work Plan as part of a multi-phase development. In addition to the Phase I Environmental Site Assessment he provided a soil and groundwater characterization program. The Los Banos Airport project measures approximately 112 acres in area.

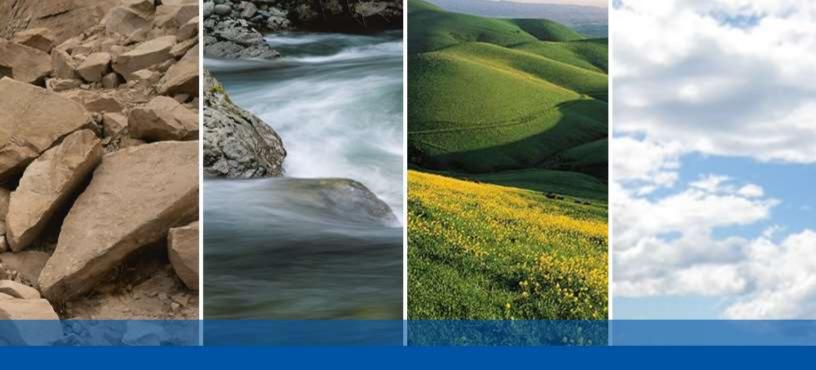

# Questa @ Neighborhood H - Mountain House-Mountain House, CA

*Project Manager.* Jeff served as project manager. He assisted in the preparation a phase one environmental site assessment in fall 2010. Under Jeff's leadership, the project team was able to effectively navigate through the complex historic records and ownership legacy associated with the property. The report that satisfied the demands and deadline of both the ownership entity and the financial institutions associated with the property. ENGEO performed a phase I environmental site assessment on the finished lots within Questa @ Neighborhood H of the Mountain House project.

# Lockheed Martin Storm Water Pond No 4—Sunnyvale, CA

Project Manager. Jeff provided permitting consultation services, including the federal and state permitting required for the maintenance of a stormwater detention system. Jeff has also provided geotechnical and environmental support to evaluate the geotechnical conditions of the site. He also determined the absence of environmentally impacted materials within the site area. The site consists of a stormwater detention basin measuring approximately 4.5 acres in area and located adjacent to sensitive habitat.
